Pursuant to SEBI Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2025/23 dated 27.02.2025, the AMC will deploy the funds garnered in an NFO within 30 business days from the date of allotment of units. In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, will be placed before the Investment Committee of the AMC. The Investment Committee may extend the timeline by 30 business days, while also making recommendations on how to ensure deployment within 30 business days going forward and monitoring the same. The Investment Committee will examine the root cause of the delay in deployment before granting approval for part or full extension. The Investment Committee will not ordinarily give part or full extension where the assets for any scheme are liquid and readily available. In case the funds are not deployed as per the asset allocation mentioned in the SID as per the aforesaid mandated plus extended timelines, AMC will:

- not be permitted to receive fresh flows in the same scheme till the time the funds are deployed as per the asset allocation mentioned in the SID.
- not be permitted to levy exit load, if any, on the investors exiting such scheme(s) after 60 business days of not complying with the asset allocation of the scheme.
- inform all investors of the NFO, about the option of an exit from the concerned scheme without exit load, via email, SMS or other similar mode of communication
- report deviation, if any, to Trustees at each of the above stages.

Portfolio Rebalancing:

As per provision no. 2.9 of SEBI Master Circular on Mutual Fund dated June 27, 2024, in the event of any deviation from mandated asset allocation mentioned above, due to passive breaches, rebalancing period will be Thirty (30) business days. In case the portfolio is not rebalanced within Thirty (30) business days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desired, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of the scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall not launch any new scheme till the time the portfolio is rebalanced and also not levy exit load, if any on the investors exiting the Scheme. However, at all times the portfolio will adhere to the overall investment objective of the Scheme.

Short Term Defensive Consideration:

As per provision no. 1.14.1.2 of SEBI Master Circular on Mutual Fund dated June 27, 2024, the asset allocation pattern indicated above may change for a short-term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. In case of any deviation, the portfolio shall be rebalanced within 30 calendar days.

B. WHERE WILL THE SCHEME INVEST

In line with the investment allocation pattern of the scheme, the scheme will predominantly invest in:

- Units of Debt-Oriented mutual fund schemes predominantly in Tata Corporate Bond Fund,
- Units of arbitrage-based equity mutual fund schemes,
- Debt & Money Market Instruments.

C. WHAT ARE THE INVESTMENT STRATEGIES ?

The scheme will allocate its assets between funds depending upon Fund Manager assessment based on parameters like Market Valuation indicators, Economic indicators, Yield environment, Commodity prices, Momentum of the asset classes. The exact allocation in various schemes would be decided based on the fund manager's outlook on prevalent market conditions and changing business environment.

SID – TATA INCOME PLUS ARBITRAGE ACTIVE FOF

The Fund manager will consider several economic parameters (like Current Account Deficit, fiscal deficit, interest rates, inflation), Market Valuation indicators (like Price to earnings ratios, Earnings Yield, Yield Gap, Market cap to GDP and Other market cycle indicators etc.) as inputs.

The Scheme shall invest in Schemes of Tata Mutual Fund and will also have the flexibility to invest in Funds from other Mutual Funds in the industry. The selection of the underlying funds shall be made on the basis of the outlook of the Fund Manager and the Past and future performance outlook of the Scheme objective.

Portfolio Turnover Policy:

Portfolio turnover in the scheme will be a function of market opportunities. It is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. The AMC will endeavor to optimize portfolio turnover to optimize risk adjusted return keeping in mind the cost associated with it. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of investment opportunities that exist in the market. Portfolio Turnover is not applicable to the Fund of Funds Scheme.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Scheme Benchmark – Crisil Composite Bond Fund Index (60%) + Nifty 50 Arbitrage Index (40%) (TRI)

Rationale:

Crisil Composite Bond Fund Index measures the performance of various fixed income portfolios covering Government securities, corporate bonds of different credit rating categories, Commercial papers, Certificate of deposits, T-Bills and Overnight rate. The Nifty 50 Arbitrage Index aims to measure the performance of such arbitrage strategies. The index measures the performance of portfolio involving investment in equity and equivalent short position equity futures, short term debt market investments and cash. The composition of the aforesaid benchmark is such that it is most suited for comparing the performance of the scheme.

The AMC/Trustees reserve the right to change benchmark in future for measuring performance of the scheme and as per the guidelines and directives issued by SEBI from time to time.

Illustration of Calculation of Sale & Repurchase Price:

Assumed NAV Rs. 11.00 per unit

Entry Load: NIL

Exit Load 1%

Sale Price = NAV + (Entry Load (%) * NAV)

Sale Price = 11 + (0% * 11)

Sale Price = 11 + 0

Sale Price = Rs. 11/-

Repurchase Price

Repurchase Price = NAV – (exit load (%) * NAV)

Repurchase Price = 11 – (1%*11)

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

In the event NAV cannot be calculated and / or published, such as because of the suspension of RBI Clearing, Bank strikes, during the existence of a state of emergency and / or a breakdown in communications, the Board of Trustees may temporarily suspend determination and / or publication of the NAV of the Units.

B. RISK FACTORS

Standard Risk Factors:

- Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of units of the scheme may go up or down.
- Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the Scheme will achieve its objective.
- As with any investment in stocks, shares and securities, the NAV of the Units under this Scheme can go up or down, depending on the factors and forces affecting the capital markets.
- Past performance of the previous Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the Scheme.
- Investment in equity and equity related securities involve high degree of risks and investors should not invest in the schemes unless they can afford to take the risk of losing their investment.
- The sponsors are not responsible or liable for any loss resulting from the operations of the scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- Tata Income Plus Arbitrage Active FOF is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme, its future prospects or the returns. Investors therefore are urged to study the terms of the scheme carefully and consult their Tax and Investment Advisor before investing in the Scheme.
- Tata Income Plus Arbitrage Active FOF is not guaranteed or assured return scheme.

Scheme Specific Risk Factors:

Risks associated with investments in Units of Mutual Fund schemes

The Scheme will invest in various types of schemes. Hence the performance of this scheme would depend upon the performance of the underlying schemes. Any change in the investment policies or fundamental attributes of the underlying schemes will affect the performance of this Scheme. Investment in the exchange traded fund will have all the risks associated with the equity markets including price risk, credit risk and reinvestment risk. Periodical rebalancing could result in higher transaction costs. This being a Fund of Funds scheme, the investors are bearing the recurring expenses of the scheme in addition to the expenses of underlying scheme in which the scheme shall make investment. However, in line with the SEBI Regulations, the total expense ratio of the Scheme including weighted average of the total expense ratio levied by the underlying scheme shall not exceed the eligible percent of the daily net assets of the Scheme.

Risk associated with Fund of Fund schemes:

- The Scheme's performance will depend upon the performance of the Underlying schemes.
- Any change in the investment policy or the fundamental attributes of the Underlying Fund in which the Scheme invests may affect the performance of the Scheme.
- The portfolio disclosure of the Scheme will be largely limited to the particulars of the relevant Underlying Fund and investments by the Scheme in debt and money market instruments.
- The scheme specific risk factors of the underlying scheme become applicable where a fund of funds invest. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme in which Fund of Funds scheme invest in. Details of the underlying funds is available on www.tatamutualfund.com.
- Dependence on the Investment Managers of the underlying scheme: The success of the underlying scheme depends on the ability of the respective Investment Managers to develop and implement investment strategies that achieve their investment objective. Moreover, subjective decisions made by the Investment Manager may cause an underlying scheme to incur losses or to miss profit opportunities.
- As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors may obtain by directly investing in such schemes.

- As the Fund of Funds scheme will invest into an underlying scheme, the expense charged being dependent on the structure of the underlying scheme (being different), it may lead to a non- uniform charging of expenses over a period of time.
- The fund of fund scheme may have different returns/performance than the underlying scheme due to various reasons. The return of the Fund of Funds may be adversely impacted by total expense ratio, cash drag, timing and pricing difference between the subscription/redemption in the Fund of Funds v/s underlying scheme, operational and transactional reasons etc.
- The subscription and redemption in the Fund of Fund scheme is also dependent on the liquidity of the underlying scheme. The illiquidity of the same may affect the performance of the Fund of Fund scheme.
- Investments in underlying schemes carry risks such as performance of securities, derivative investments, credit rating changes, trading volumes, settlement periods, price/interest rate risk, volatility, and liquidity issues.
- Arbitrage Fund Risks: Investments in Arbitrage Funds include risks related to securities performance, derivative investments, trading volumes, settlement periods, volatility, basis risk, spread risk, and re-investment risk. Refer to Scheme Information Documents for specific risk factors.
- Redemption and Liquidity: High redemption requests and market conditions may cause delays in unit redemptions. Portfolio rebalancing may lead to higher transaction costs and exit loads or redemption charges may impact performance.

Risks associated with investments in equity instruments by underlying scheme

The scheme specific risk factors of the underlying scheme become applicable where a fund of funds invests.

Investment Risks

Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilizing debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be in a position to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

Risks associated with Debt/Money Markets Instruments

Interest Rate Risk

As with debt/money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Risks associated with Segregated Portfolio

Investors holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realize any value. Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with transaction in Units through stock exchange(s)

In respect of transactions in Units of the Scheme through BSE and / or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Money Market Instruments like commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time.

Overview of Debt Market:

The major players in the Indian Debt Markets are banks, financial institutions, insurance companies and mutual funds. The instruments in the market can be broadly categorized as those issued by corporate, banks, financial institutions and those issued by state/central governments. The risk associated with any investments are – credit risk, interest rate risks and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The liquidity risk in the corporate securities market is higher compared to those of government securities. The liquidity risk in the corporate securities market is higher compared to those of government securities. Liquidity in the corporate debt market has been improving due to the entry of more players and due to various measures taken by the regulators to increase the liquidity and transparency such as introduction of repo in corporate bonds, Credit Default Swaps, compulsory reporting of secondary market OTC transactions on exchange platforms to name a few. Moreover, the recent successful introduction of Interest Rate Future on the benchmark 10-year Government Bond will also be likely to increase the depth in the debt market.

The market participants in the corporate debt and gilt markets are banks, financial institutions, mutual funds, corporates, insurance companies, FPIs, primary dealers and provident funds. The main debt instruments in the market are those issued by Corporates and State/Central Governments. Corporate papers carry credit risk while government securities are believed to carry no credit risk. The main risks with investments in debt securities are interest rate risk, credit risk and liquidity risk. Interest rate risk associated with debt instruments depends on the macroeconomic environment. It includes both market price changes due to changes in yields as well as coupon reinvestment rate risk. Corporate papers carry higher liquidity risk as compared to gilts due to the depth of the gilt market.

Money Market:

Money market encompasses a wide range of instruments with maturities ranging from one day to a year, issued by Government, Banks and corporates etc. and traded in markets of varying liquidity. The risk associated with any investments are – credit risk, interest rate risk and liquidity risk. However, such risks are lower in the case of money market instruments compare to other debt instruments. Further, within the gamut of money market instruments as available in the market, such risks are very low in the case of instruments issued by government. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk.

The following table attempts to give a broad overview of the available instruments in the financial markets and their risk return profile. The data given in the table is based on market conditions around the date of the Offer document and can at best be considered indicative:

Illustration of Calculation of Sale & Repurchase Price:

Assumed NAV Rs. 11.00 per unit

Entry Load: NIL

Exit Load 1%

Sale Price = NAV + (Entry Load (%) * NAV)

Sale Price = 11 + (0% * 11)

Sale Price = 11 + 0

Sale Price = Rs. 11/-

Repurchase Price

Repurchase Price = NAV – (exit load (%) * NAV)

Repurchase Price = 11 – (1%*11)

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

In the event NAV cannot be calculated and / or published, such as because of the suspension of RBI Clearing, Bank strikes, during the existence of a state of emergency and / or a breakdown in communications, the Board of Trustees may temporarily suspend determination and / or publication of the NAV of the Units.

However, in view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors with respect to the specific amount of tax and other implications arising out of his or her participation in the Scheme.

Withholding tax on income distribution

Type of Investor	Withholding Tax Rate
Resident	10%*
NRI	20%** or rate as per applicable tax treaty*** (whichever is lower)

* Tax not deductible if income distributed in respect of units of a mutual fund is below Rs. 5,000 in a financial year.

** The base tax is to be further increased by surcharge at the rate of:

- 37% on base tax where total income exceeds Rs. 5 crore;
- 25% where total income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore

*** The income distributed by mutual fund to unitholders is unlikely to fall within the definition of dividend under the tax treaty. Given this and the language of the newly inserted proviso to section 196A, claiming tax treaty benefit in respect of income distributed by mutual fund to unitholders for withholding tax purpose may not be possible.

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge.

Withholding tax applicability in case of Inoperative PAN

As per section 139AA of the Income-tax Act, 1961, read with rule 114AAA of the Income-tax Rules, 1962, in the case of a resident person, whose PAN has become inoperative due to non-linking of PAN with Aadhaar, it shall be deemed that he has not furnished the PAN and tax could be withheld at a higher rate of 20% as per section 206AA of Income-tax Act, 1961. ^^^^ This lower rate is optional for companies engaged in manufacturing business (set-up & registered on or after 1 October 2019) subject to fulfillment of certain conditions as provided in section 115BAB.

Note 1 - Capital gains from transfer of units of "specified mutual fund schemes" acquired on or after 1st April 2023 are treated as short term capital gains taxable at applicable slab rates, irrespective of the period of holding of such mutual fund units.

The Finance Act, 2023 introduced section 50AA which deems any gains on transfer / redemption of units of specified mutual funds acquired on or after 1 April 2023 as short-term capital gains. For the purposes of section 50AA, "specified mutual fund" means a mutual fund by whatever name called, *where not more than 35% of its total proceeds is invested in the equity shares of domestic companies*. Accordingly, an "equity-oriented fund" which invests in units of another fund instead of investing directly in equity shares of domestic company may be regarded as "specified mutual fund" as per section 50AA of the Act and taxed accordingly.

The Finance (No. 2) Act 2024 has further amended the definition of the specified mutual fund (applicable from financial year 2025-26) and as per amended definition "specified mutual fund" means "(a) a mutual Fund by whatever name called, which invest more than sixty five percent of the total proceeds in debt and money market instrument or; (b) *a fund which invests sixty five percent or more of its proceeds in units of fund referred to in sub-clause (a)*". Accordingly, as per the amended definition, which is applicable from FY 2025-26, only debt oriented mutual fund schemes (including fund of fund) should be covered within the ambit of section 50AA of the Act].

\$ Surcharge to be levied at:

- ☐ 37% on base tax where Specified income** exceeds Rs. 5 crore;
- ☐ 25% where Specified income** exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- ☐ 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- ☐ 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

**Specified income – Total income excluding income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes. In case the total income includes such specified income, surcharge on such specified income shall not exceed 15%.

Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10 percent to be levied on base tax for the companies opting for lower rate of tax of 22%/15%. Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

Further, the domestic companies are subject to minimum alternate tax (except for those who opt for lower rate of tax of 22%/15%) not specified in above tax rates.

Provisions in relation to segregated portfolios of a mutual fund scheme are as follows –

In section 2 in clause (42A) of the Income-tax Act, 1961 the following amendment has been made "(hh) in the case of a capital asset, being a unit or units in a segregated portfolio referred to in sub-section (2AG) of section 49, there shall be included the period for which the original unit or units in the main portfolio were held by the assessee;"

In section 49 of the Income-tax Act, 1961 after sub-section (2AF), the following has been inserted, namely:—

(2AG) The cost of acquisition of a unit or units in the segregated portfolio shall be the amount which bears, to the cost of acquisition of a unit or units held by the assessee in the total portfolio, the same proportion as the net asset value of the asset transferred to the segregated portfolio bears to the net asset value of the total portfolio immediately before the segregation of portfolios.

(2AH) The cost of the acquisition of the original units held by the unit holder in the main portfolio shall be deemed to have been reduced by the amount as so arrived at under sub-section (2AG).

Explanation– For the purposes of sub-section (2AG) and sub-section (2AH) of section 49, the expressions "main portfolio", "segregated portfolio" and "total portfolio" shall have the meanings respectively assigned to them in provision no. 4.4 of SEBI Master circular on Mutual Fund dated Jun 27, 2024, issued by the Securities and Exchange Board of India under section 11 of the Securities and Exchange Board of India Act, 1992.

Clause(42A) of section 2 defines the expression "short term capital asset" to be a capital asset held by an assessee for not more than twenty-four months immediately preceding the date of its transfer.

Provided that in the case of a security listed in a recognized stock exchange in India, the provisions of this clause shall have effect as if for the words "twenty-four", the words "twelve months" had been substituted:

If the unit or units in a segregated portfolio are held for twenty-four months or less from the original date of acquisition of units in the Main portfolio then the same will constitute 'short term capital assets' and any capital gains arising therefrom shall be considered as 'short term capital gain'. On the contrary, if the unit or units in a segregated portfolio are held for more than twenty-four months from the original date of acquisition of units in the Main portfolio then the same will constitute 'long-term capital assets' and any capital gains arising therefrom shall be considered as 'long term capital gain'.

However, the allotment of units in a segregated portfolio of a mutual fund scheme shall not be considered as 'Transfer' under section 47 of the Income-tax Act, 1961. These amendments are applicable from AY 2020-21.

Example:

Suppose Mr. X had invested in a scheme of a mutual fund on 01-01-2015 when the NAV was Rs. 10. On May 1, 2019, when NAV of the scheme was Rs. 20, segregation of portfolio was created due to a credit event.

Post creation of the segregated portfolio, the NAV of the main portfolio was Rs. 16 and the segregated portfolio was Rs 4. Hence, the proportion is 80:20 of the total portfolio. The cost of acquisition of the main portfolio and the segregated portfolio should be taken as Rs. 8 and Rs. 2 respectively.

Similarly, the period of holding of the units of the main portfolio and the segregated portfolio should be reckoned from 1st January 2015.

The information stated above is based on Tata Mutual Fund understanding of the tax laws and only for the purpose of providing general information to the unit holders of the schemes. In view of the individual nature of tax implications, each unit holder is advised to consult with his or her own tax advisors with respect to the specific tax and other implications arising out of the restructuring.

Any tax liability arising post redemption on account of change in tax treatment with respect to Tax on Income Distribution/Capital Gain Tax, by the tax authorities, shall be solely borne by the investors and not by the AMC or Trustee Company.

For further details on taxation please refer the clause on taxation in SAI.
