ECONOMIC OVERVIEW

Global Economic Growth

- US gross domestic product (GDP) grew at an annualised rate of 2.0% in the third quarter compared with 6.7% in the previous quarter.
- Eurozone GDP expanded 3.7% on-year in the third quarter compared with revised growth of 14.2% on-year in the second quarter.
- UK GDP rose 5.5% sequentially in the second quarter compared with preliminary estimate of 4.8% growth, and reversing a 1.4% fall in the first quarter.
- Japan's GDP grew an annualized 1.9% in the second quarter, higher than the initial estimate for a 1.3% rise, and compared with a 4.2% contraction in the first quarter.

Global Central Bank Highlights

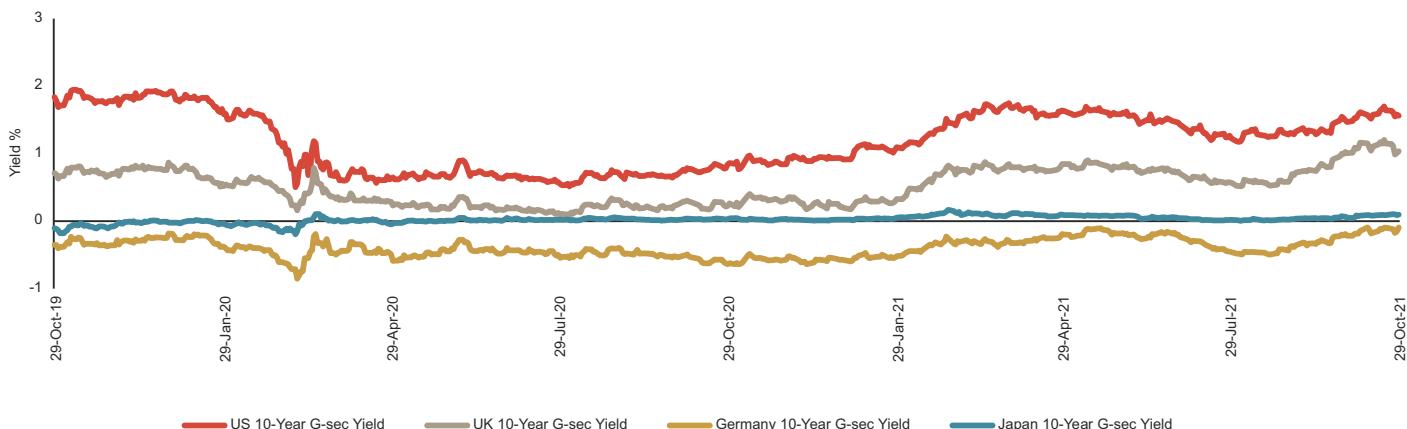

- The US Federal Reserve's (Fed) September 21-22 meeting minutes showed that officials broadly agreed to gradually start reducing emergency pandemic support to the economy in coming quarters even though the delta variant continued to create headwinds.
- The European Central Bank left monetary policy rates unchanged. The policymakers also said they continue to believe that favourable financing conditions can be maintained with a moderately lower pace of net asset purchases than the second and third quarters of this year.
- The People's Bank of China maintained its benchmark loan prime rates (LPRs) for the 18th consecutive month, with one-year and five-year LPRs kept unchanged at 3.85% and 4.65%, respectively.
- The Bank of Japan left its key rates unchanged. The central bank cut its projected GDP rate for the current fiscal year to 3.4% from the earlier forecast in July of 3.8%, citing sluggish consumption and a slowdown in exports and output due to Covid-19 linked production and supply disruptions, worsening of trade terms on the account of rising material prices and supply chain disruptions due to worldwide factory parts shortages.

ECONOMIC OVERVIEW

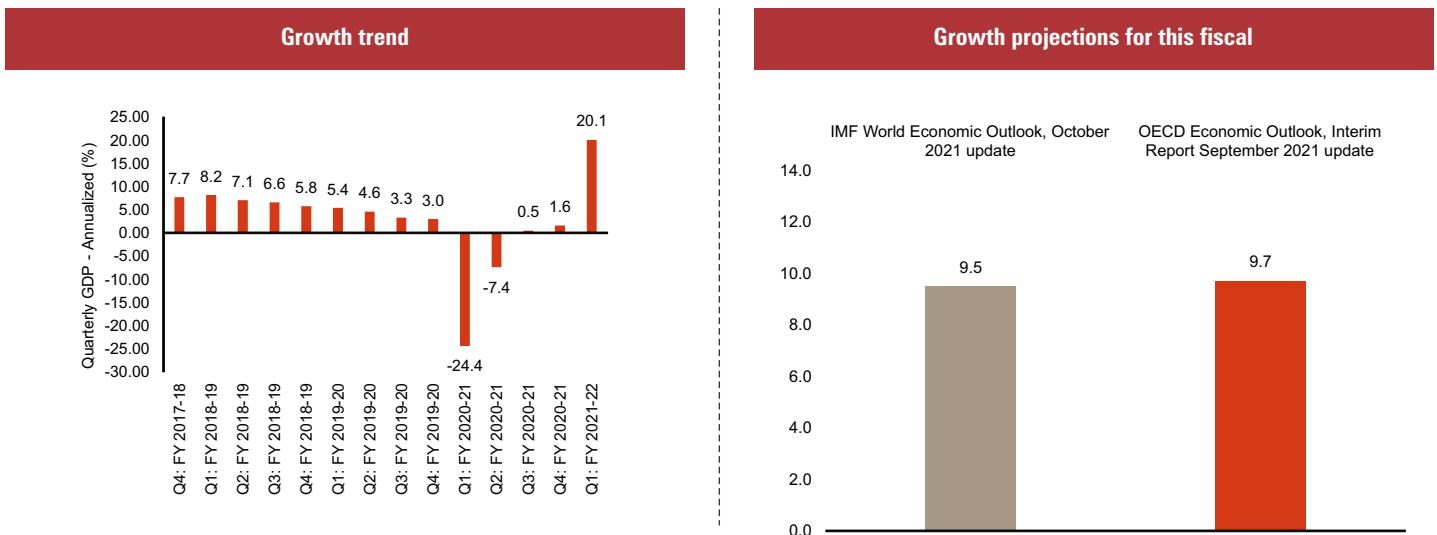

Global Bond Yields

Source: Financial websites

- US treasury prices ended lower, with the yield of the 10-year paper settling at 1.56% on October 29 compared with 1.49% on September 30.
- Concerns over inflationary pressures in the US and a tighter Fed monetary policy pulled bond prices down.
- Yields rose further after US lawmakers reached a deal to raise the debt ceiling to avoid a potential default by the government. The deal increases the debt limit by \$480 billion to about \$28.8 trillion.
- The release of some encouraging domestic economic indicators also contributed to hardening of yields as they supported the view that the US central bank would raise interest rates sooner than expected.
- Intermittent gains in domestic equities amid robust corporate earnings announcements dented the safe haven appeal of treasuries further.
- Global economic growth concerns following the withdrawal of stimulus measures by some global central banks supported bond prices. The Bank of Canada announced that it is ending its quantitative easing program, joining a growing number of central banks that are rolling back their pandemic era programmes.
- Worries that rekindling of US-China tensions could magnify supply-chain disruptions also contributed to a rise in bond prices.
- Prices also gained after US Treasury Secretary Janet Yellen said that she expected inflation levels to fall back to the more acceptable 2% level in the middle of the second half of 2022.

India Growth

None of the aforesaid recommendations are based on any assumptions. These are purely for reference and the investors are requested to consult their financial advisors before investing.

ECONOMIC OVERVIEW

- India's GDP continued to grow for the third straight quarter in April-June (first quarter) of this fiscal, recording a 20.1% rate compared with 1.6% in the March quarter (fourth quarter of fiscal 2021).
- In Gross value-added (GVA) terms, the economy grew 26.5% compared with 3.7% in the previous quarter.
- The agriculture sector grew 4.5% in the first quarter compared with 3.1% in the previous quarter.
- Manufacturing grew 49.6% compared with 6.9% in the previous quarter and mining 18.6% compared with 5.7% contraction.
- The construction sector grew 68.3% compared with 14.5% and electricity and other public utilities 14.3% compared with 9.1%.
- CRISIL has maintained its GDP growth forecast at 9.5% for the fiscal compared with 11% predicted earlier, noting that while the economic recovery continues to gather momentum, suggesting waning impact of the Covid-19, the rebound will only be gradual. Even as exports and government capex do well, broad-based support from household consumption and private capex remains elusive.

Other Major Indicators

CPI-based inflation eased to 4.35% in September from 5.3% in August following a pullback in food prices

Index of Industrial Production grew 11.9% in August compared to a 7.1% contraction a year ago and 11.45% growth in July.

Core sector output growth in September slowed to 4.4% on-year from 11.5% in August, weighed down by reduced growth in electricity and steel output

Nikkei manufacturing Purchasing Managers' Index (PMI) for September came in at 53.7 vs 52.3 in August, while the services PMI fell to 55.2 in September from 56.7 in August

MARKET REVIEW

India Equity Market Performance

Source: NSE, BSE, SEBI, NSDL * Data till October 28, 2021

- The S&P BSE Sensex and the Nifty 50 gained around 0.30% this month on hopes of a domestic economic recovery and optimism over corporate earnings.
- Investors cheered after major companies reported strong quarterly earnings which lifted hopes that the economic recovery is on track. With a fall in daily cases of Covid-19 in the country, states are also preparing to reopen economic activity in a phased manner.
- Market sentiment strengthened further after the Reserve Bank of India (RBI) pledged to continue its easy monetary policy to sustain growth and mitigate the pandemic's impact on the economy. In its October policy meet, the RBI kept interest rates unchanged, retained the current fiscal's GDP growth forecast at 9.5% and lowered retail inflation projection to 5.3% for the current fiscal. The downward revision of inflation estimates reassured investors that the stimulus would continue in the near term.
- Improved macroeconomic data also lifted domestic equities. India's CPI-based inflation eased to 4.35% in September compared with 5.30% in August following a pullback in food prices. Further, India's factory output grew 11.9% in August compared with a 7.1% contraction a year ago and 11.45% growth in July.
- Continued buying by domestic institutional investors (DIIs) and mutual funds further buoyed the market. DIIs bought equities worth Rs 44.7 billion in October compared with Rs 59.5 billion in September. As of October 28, mutual funds bought equities worth Rs 15.8 billion, compared with Rs 69.6 billion in the last month.
- Positive global cues, including the US House of Representatives providing the final nod to legislation that temporarily raises the government's borrowing limit to \$28.9 trillion, aided the upward trend in the market.
- However, gains were trimmed after foreign institutional investors (FIIs) snapped their two-month buying streak in the Indian markets. FIIs turned net sellers by selling Rs 135.5 billion equities in October compared with net buying of Rs 131.5 billion equities in September.
- Investors also booked profits after the benchmark indices touched record highs multiple times in October. The benchmark Sensex breached the 62,000 mark, while Nifty 50 topped the 18,600 level, which triggered valuation concerns and prompted investors to book profits. Further, a global investment bank downgraded Indian equities to equal weight from overweight due to expensive valuations.
- Some weak global pointers including downbeat economic growth numbers from the US and Eurozone, and rising global bond yields weighed on the market.
- Concerns over the health of the Chinese economy after a global brokerage firm downgraded Chinese developers and the country's plans to impose fresh tax regulations on real estate firms affected the domestic benchmarks further.
- On the sectoral front, auto, banking and consumer durables sectors gained the most in October. The S&P BSE Auto rallied 6%, while S&P Bankex and S&P BSE Consumer Durables gained around 4.5% each. The S&P BSE FMCG declined about 6%, S&P BSE Healthcare fell 4% and S&P BSE Realty dipped around 3% in October.

Equity Market Outlook

Global equities gained 5% in October, 2021. In the quarter, global GDP growth expanded but there was a substantial step back in the speed of the recovery. The pace of recovery was interrupted by intensification of manufacturing supply constraints and an inflation surge that had taken a heavy toll on goods demand. As pandemic headwinds fade, the pro-growth bias and healthy private-sector balance sheets would unleash pent-up demand for services and stock-building. (Source: JP Morgan Research)

MSCI India underperformed MSCI EM marginally after a strong outperformance in September 2021. MSCI India has outperformed MSCI EM by more than 20% in CY-2021. The outperformance of Indian markets can be attributed to the India's insulation from a potential slowdown, steady trends on pandemic front, govt. reforms/relief measures (Telcos, Auto, Banks etc.) and record low interest rates which placed India in a relatively better position than other economies. (Source: Morgan Stanley Research)

Indian equity market after reaching record highs in the first-half, corrected in the second-half of the month, S&P BSE Sensex settled with almost flat gains. Stretched valuations, rising crude and mixed earnings were some of the reasons that could be attributed to the sell-off. Covid cases during the month remained under control (daily sub-20k) even as vaccine doses crossed the 1bn mark. S&P BSE Midcap and S&P BSE Smallcap indices underperformed the broader markets and posted a return of 0.1% and -0.4% respectively. We believe Indian markets are underpinned by the following factors: 1. Gradual reopening of the economy 2. Healthy vaccination rate 3. Robust earnings outlook 4. RBI policy stance 5. Capex push by the govt. (Source: Kotak Research, Julius Bar & JP Morgan Research)

In sector trends, domestic cyclicals outperformed, Auto, Banks and Utilities were the standout performer, mainly a catch-up act and sentiments improving due to economic activity improving. FMCG, Pharma and Realty were the laggards.

FPI flows turned negative in both the debt and equity markets. Domestic mutual funds purchased stocks for an eighth consecutive month. Total institutional activity turned negative for the first time in 6 months.

Other key developments include: (1) the RBI MPC decided to keep policy rates and accommodative stance unchanged, (2) PM announced GatiShakti to boost India's infra development, (3) the minutes of the FOMC's September meeting highlighted that the Federal Reserve could begin reducing asset purchases as soon as mid-November (4) Moody's changed India's sovereign rating outlook from 'negative' to 'stable'. (Source: Kotak Research) (FOMC: Federal Open Market Committee)

Our view going forward:

- Long-term view on equity remains positive, however the medium-term view has turned cautious due to valuations moving higher.
- Broad market valuations are not cheap.
- There are few pockets across sectors which are still reasonably valued.
- We remain positive on sectors/themes like Oil & Gas, Construction, Banks, Auto, Pharma and PSU companies, where the valuation, earnings or dividend yield remains attractive.
- In terms of trigger, we would continue to monitor US 10 Year treasury yield and US Fed roadmap for withdrawal of stimulus.
- Sentiments remains high and in certain areas appears to be euphoric.

Hence, to summarize, we believe this phase may require investment portfolios to be highly nimble while giving due importance to overall asset allocation. Therefore, we recommend adapting the 'ABCD' investment framework with an aim to benefit from fast changing macros and to manage volatility. Asset Allocation schemes: A -Asset Allocation Strategy (ICICI Prudential Asset Allocator Fund (FOF)) & Multi Asset Strategies (ICICI Prudential Multi-Asset Fund), B - ICICI Prudential Balanced Advantage Fund, C - ICICI Prudential Business Cycle Fund, D - Strategy which is available at Discount to broader markets - ICICI Prudential Focused Equity Fund and ICICI Prudential Value Discovery Fund. Investing in these schemes over long term may provide a thrust to your wealth creation journey

Our Recommendations

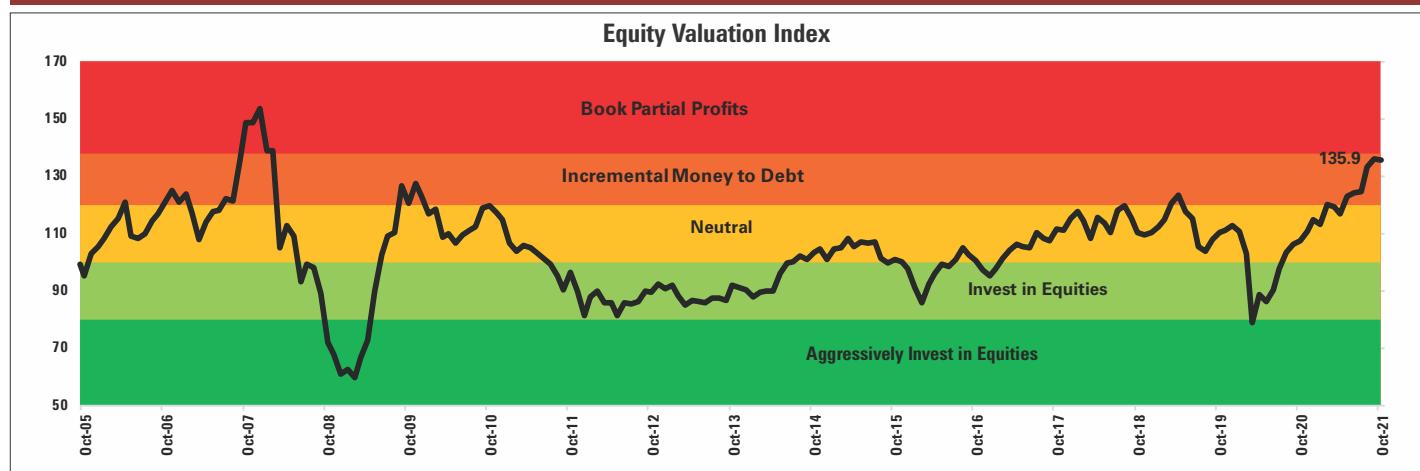

The below table acts as a guide for investors who are either over invested or have a balanced exposure or are under invested in Equity			
	Overweight Equity	Balanced Exposure	Underweight Equity
What should you do?	Book partial profits	Remain invested	Invest in Asset Allocation Scheme or equity scheme with flexibility
Which Schemes to invest?	Move partial profits to Hybrid/Fund of Fund schemes. Recommended Schemes: 1. ICICI Prudential Balanced Advantage Fund 2. ICICI Prudential Asset Allocator Fund (FOF) 3. ICICI Prudential Multi-Asset Fund 4. ICICI Prudential Equity Savings Fund	Continue investing in hybrid/Fund of Fund schemes Recommended Schemes: 1. ICICI Prudential Multi Asset Fund 3. ICICI Prudential Balanced Advantage Fund 2. ICICI Prudential Asset Allocator Fund (FOF)	Invest in equity scheme with higher flexibility of investing across market caps, themes, sectors etc* Recommended Schemes: 1. ICICI Prudential Flexicap Fund 2. ICICI Prudential Business Cycle Fund 3. ICICI Prudential Value Discovery Fund 4. ICICI Prudential Focused Equity Fund 5. ICICI Prudential MNC Fund
Plan of action for SIP/ STP	Continue SIP/STP as the long term view remains intact, we recommend ICICI Prudential Freedom SIP* and ICICI Prudential Booster STP*		

*The investment Strategy and allocation will be as per the Scheme Information Document. You may refer to our "Markets at 60000 level" file released in September 2021 for detailed basis for "our recommendation", by clicking on the link: <https://www.icicipruamc.com/downloads/market-outlook/Market at 60000 level: Our View and recommendation>

Equity Market Outlook

Equity Valuation Index

Equity Valuation index is calculated by assigning equal weights to Price-to-Earnings (PE), Price-to-Book (PB), G-Sec*PE and Market Cap to GDP ratio. G-Sec – Government Securities. GDP – Gross Domestic Product, Data as of October 31, 2021

G-sec and corporate bonds data as of October 29, 2021

*Weighted average yields for G-sec data

6 month G-sec: 182 day T-Bill rate; 1 year G-Sec: 6.84% GS 2022; 3 year G-Sec: 6.18% GS 2024; 5 year G-Sec: 6.97% GS 2026; 10 year G-Sec: 6.10% GS 2031

Liquidity in the banking system

Source: RBI

- Interbank call money rates remained below the RBI's repo rate of 4% in October amid surplus liquidity in the system.
- To absorb excess liquidity, the RBI conducted several variable rate reverse repo auctions during the month.
- Gilts declined in October, with the yield on the 10-year benchmark 6.10% 2031 paper settling at 6.39% on October 29, 2021 compared with 6.22% on September 30, 2021.
- Prices were primarily affected by an increase in crude oil prices and US benchmark treasury yields. Crude oil prices have risen recently due to a rebound in demand, while supply has remained tight. Meanwhile, the risk of higher inflation has contributed to a rise in US benchmark treasury yields.
- Gilts declined further as the RBI halted its bond purchase programme and announced a plan to withdraw excess liquidity from the banking system.
- Supply pressure due to weekly debt sales added to the fall in prices.
- However, some losses were recouped after data showed that domestic retail inflation had eased for the fourth consecutive month in September.
- Intermittent pullback in US Treasury yields and crude oil prices, coupled with foreign banks' purchases of bonds, also supported the prices.

Fixed Income Outlook And Valuation Index:

Economic activity gained traction due to fall in Covid-19 infections, easing of restrictions and a sharp pick-up in the pace of vaccination. RBI's Consumer Confidence Survey for September 2021 showed that a larger proportion of the respondents reported improvement in the general economic situation compared to the July 2021 survey.

Retail inflation based on Consumer Price Index (CPI) softened to 4.35% in September 2021 as food prices dropped. The CPI inflation was at 5.3% in August 2021 and at 7.27% in September 2020. Inflation outlook for the Oct-Dec 2021 period is likely to remain within the comfort range of the Reserve Bank of India (RBI), mainly due to a high base and easing food prices. (Source: MoSPI, RBI).

Gilt securities saw an uptick in yields with the benchmark 10-year going up to 6.39% as on October 29 from 6.22% as on September 30. Higher volatility was visible in the shorter end of the curve, with the 2-Y yield touching 5.06% on Oct 22 from 4.70% as on Sep 30.

As the LAF (Liquidity Adjustment Facility) corridor was widened last year, short-term rates fell more than long-term rates. Market expects short-term rates to rise over the next year as the central bank begins to normalize liquidity conditions. As uncertainty reduces, the inflation target is well internalized, and government borrowing requirements reduce, term spreads could fall further. The yield curve is likely to flatten, although oil price uncertainty risk prevails. (Source: RBI)

In its October meeting, the Monetary Policy Committee kept key policy rates unchanged, continuing its accommodative stance while remaining cautious over emanating risks. In a move that hinted at normalization of monetary policy, the central bank discontinued its government securities acquisition programme (G-SAP) and stepped up liquidity withdrawal via variable rate reverse repo (VRRR) auctions, with a targeted Rs 6 trillion from Rs 4 trillion currently. The RBI is also testing a longer 28-day VRRR auction. (Source: RBI)

While the RBI is not permanently reducing the excess liquidity in the market, it is trying to absorb it via VRRR on a durable basis. At the same time, the RBI is trying to reduce the steepness of the longer end of the yield curve by targeting the shorter end of the curve.

We believe the economy will continue to revive, supported by ebbing of infections, the robust pace of vaccination, Govt's focus on capital expenditure, supportive monetary and fiscal measures and buoyant external demand. But increasing volatility in the shorter-end of the yield curve warrants a more active duration strategy to sail through rising interest rates.

Also, as communicated earlier, the below mentioned strategy would provide better accrual (active strategy which may take advantage of higher term premium) and would help in mitigating mark-to-market impact (active strategy of having adequate short duration instruments). It may be an opportune time to invest in floating rate bond in this interest rate scenario to hedge interest rate volatility.

In the coming year, we recommend following strategies: Accrual Strategy and Active Duration strategy. Accrual strategy due to high spread premium which is still prevalent between the spread assets and AAA & MMI instruments, as going forward capital appreciation strategy may take a back seat due to limited rate cuts. Term premiums (spread between longer and shorter end of the yield curve) remains one of the highest seen historically, because of which active duration strategy is recommended to benefit from the high term premium. In our portfolios, we may follow barbell strategy i.e having high exposure to extreme short-end instruments with an aim to protect the portfolio from interest rate movements and high exposure to long-end instruments with an aim to benefit from higher carry.

Debt Valuation Index

Data as on October 31, 2021. Debt Valuation Index considers WPI, CPI, Sensex returns, Gold returns and Real estate returns over G-Sec yield, Current Account Balance, Fiscal Balance, Credit Growth and Crude Oil Movement for calculation. RBI – Reserve Bank of India

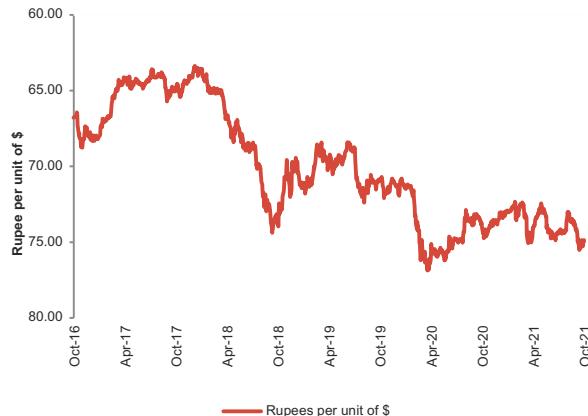

MARKET OUTLOOK

Fixed Income Outlook

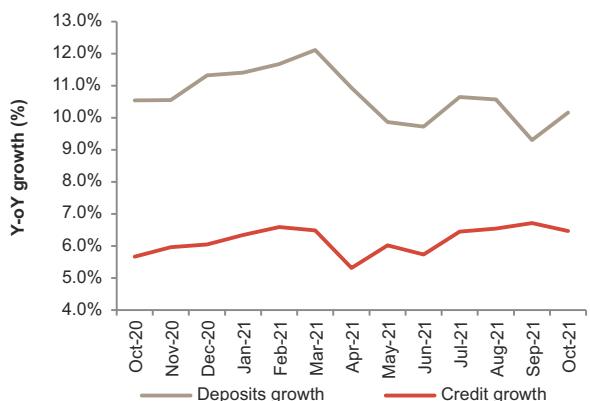

Other Market Indicators

Rupee declined 0.8% to settle at Rs 74.87 on October 29 compared to Rs 74.24 per dollar on September 30

*Data as of October 8, 2021

Bank deposit and credit growth rose 10.2% and 6.5% on-year in October 2021* compared with 9.3% and 6.7% in September, respectively

Brent crude prices rose nearly 7.5% to close at \$84.38 per barrel on October 29 as against \$78.52 per barrel a month back

Indian gold prices rose ~4.6% in October to close at Rs 47,975 per 10 grams on October 29, vs Rs 45,851 per 10 grams on September 30

 8. The performance of the scheme is benchmarked to the Total Return variant of the Index. As TRI data is not available since inception of the scheme, the additional benchmark performance is calculated using composite CAGR of Nifty 50 PRI values from 01-Oct-94 to 30-Jun-99 and TRI values since 30-Jun-99. The benchmark of the scheme has been revised from S&P BSE 500 TRI to Nifty500 Multicap 50:25:25 TRI w.e.f. Jan 29, 2021. For benchmark performance, values of earlier benchmark has been used till 28th January 2021 and revised benchmark values have been considered thereafter.

NAV (Rs.) Per Unit (as on October 29,2021 : 11.6818)	9.9451	-	-	-	-

Simple annualized returns have been provided as per the extant guidelines since the scheme has completed 6 months but not 1 year. However, such returns may not be representative. Absolute returns of the Scheme for the 6 month period is 17.46%.

- Different plans shall have different expense structure. The performance provided are of plans mentioned above.
 - Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment.
 - Performance for Schemes not having Growth/Cumulative Options have been calculated considering the IDCW Option, post adjustment of the IDCW Factor. Performance of IDCW option would be Net of statutory levy, if any.
 - Load is not considered for computation of returns.
 - In case, the start/end date of the concerned period is a nonbusiness date (NBD), the NAV of the previous date is considered for computation of returns.
 - Since respective schemes/ options have not completed relevant period (1yr, 3yr or 5yr) after allotment or units were not available throughout the respective period, no returns are available. ^ Inception date shown is the date from which units under the plans are available throughout.
 - Please Refer page no. 146 for Fund Manager details.
 - The performance of the scheme is benchmarked to the Total Return variant of the Index
- Scheme count for the total schemes managed by the Fund Managers does not include Capital Protection Oriented Funds, Multiple Yield Funds, Fixed Maturity Plans and Fund of Funds.

ANNEXURE FOR RETURNS OF ALL THE SCHEMES

Returns shown for Growth/IDCW Option wherever applicable as on 31 October, 2021

1. Different plans shall have different expense structure. The performance provided are of plans mentioned above.
2. Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment.
3. Performance for Schemes not having Growth/Cumulative Options have been calculated considering the IDCW Option, post adjustment of the IDCW Factor. Performance of IDCW option would be Net of statutory levy, if any.
4. Load is not considered for computation of returns.
5. In case, the start/end date of the concerned period is a nonbusiness date (NBD), the NAV of the previous date is considered for computation of returns. The NAV per unit shown in the table is as on the start date of the said period.
6. Since respective schemes/ options have not completed relevant period (1yr, 3yr or 5yr) after allotment or units were not available throughout the respective period, no returns are available. ^ Inception date shown is the date from which units under the plans are available throughout.
7. Please Refer page no. 146 for Fund Manager details.
8. The performance of the scheme is benchmarked to the Total Return variant of the Index

8. The performance of the scheme is benchmarked to the Total Return variant of the Index

"The Scheme offered is "oriented towards protection of capital" and "not with guaranteed returns". The orientation towards protection of the capital originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover etc. The ability of the portfolio to meet capital protection on maturity to the investors can be impacted in certain circumstances including changes in government policies, interest rate movements in the market, credit defaults by bonds, expenses, reinvestment risk and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets. Accordingly, investors may lose part or all of their investment (including original amount invested) in the Scheme. No guarantee or assurance, express or implied, is given that investors will receive the capital protected value at maturity or any other returns. Investors in the Scheme are not being offered any guaranteed/assured returns."

1. Different plans shall have different expense structure. The performance provided are of plans mentioned above.
2. Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment.
3. Performance for Schemes not having Growth/Cumulative Options have been calculated considering the IDCW Option, post adjustment of the IDCW Factor. Performance of IDCW option would be Net of statutory levy, if any.
4. Load is not considered for computation of returns.
5. In case, the start/end date of the concerned period is a nonbusiness date (NBD), the NAV of the previous date is considered for computation of returns. The NAV per unit shown in the table is as on the start date of the said period.
6. Since respective schemes/options have not completed relevant period (1yr, 3yr or 5yr) after allotment or units were not available throughout the respective period, no returns are available. ^ Inception date shown is the date from which units under the plans are available throughout.
7. Please Refer page no. 146 for Fund Manager details.
8. The performance of the scheme is benchmarked to the Total Return variant of the Index
9. The name of "ICICI Prudential Moderate Fund (FOF)" is changed to "ICICI Prudential Income Optimizer Fund (FOF)" w.e.f. February 03, 2020.

ANNEXURE FOR RETURNS OF ALL THE SCHEMES

ICICI Prudential Fund of Fund Series (Open ended fund of funds scheme investing in Domestic Mutual Fund schemes)

WHY SHOULD ONE INVEST?
Customised investment solutions to match risk return profile.

Returns shown for Cumulative Option as on 31 October, 2021

Investors may please note that they will be bearing the recurring expenses of this Scheme in addition to the expenses of the underlying Schemes in which this Scheme makes investment.

Benefits of Systematic Investment Plan (SIP) - SIP Performance of Select Schemes

Returns shown for Growth Option as on 31 October, 2021

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

Data as on October 31, 2021.

Single plan structure for the schemes of the Fund:

W.e.f. October 1, 2012 fresh subscriptions/switch-ins are accepted only under a single plan for all the schemes. Fresh subscriptions / switch-ins in other plans of the schemes shall not be accepted w.e.f. October 1, 2012. However, such plans will continue till the existing investors remain invested in the plan.

Note Pertaining to Direct Plan ,which was introduced w.e.f. 1st Jan 2013 :

Direct Plan is only for investors who purchase/subscribe Units in a Scheme directly with the Fund. Direct Plan shall be the default Plan. Thus, if the Purchase/ Switch application does not specifically state the details of the plan then the same shall be processed under the Direct Plan if no distributor code is mentioned in the application. Otherwise it shall be processed under the *Other than Direct plan*.

IDCW is gross IDCW. To arrive at the net IDCW payable for corporate and non-corporate investors applicable IDCW distribution tax, if any, needs to be adjusted respectively. Past performance may or may not be sustained in future. After payment of IDCW the NAV has fallen to the extent of payout and distribution taxes if applicable. For complete IDCW history details please refer to our website www.icicipruamc.com, Download section-NAV and IDCW history section.

Distribution of IDCW is subject to availability of distributable surplus and approval of Trustees.

When units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

For information on Record Date for declaration of IDCW under various Schemes of the Fund with IDCW distribution frequency ranging from daily up to monthly distribution investors are requested to visit https://www.icicipruamc.com/docs/default-source/default-documentlibrary/icici_013_dividend-addendum_27-march-2021.pdf?sfvrsn=62de3112_0

ICICI Prudential NV20 ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Nifty Index Fund

An open-ended index linked growth scheme seeking to track the returns of the Nifty 50 through investments in a basket of stocks drawn from the constituents of the above index.

The objective of the Scheme is to invest in companies whose securities are included in Nifty and subject to tracking errors, to endeavor to achieve the returns of the above index as closely as possible. This would be done by investing in almost all the stocks comprising the Nifty 50 in approximately the same weightage that they represent in Nifty 50. The Scheme will not seek to outperform the Nifty 50 or to under perform it. The objective is that the performance of the NAV of the Scheme should closely track the performance of the Nifty 50 over the same period. However, there is no assurance or guarantee that the investment objective of the scheme shall be achieved.

ICICI Prudential Nifty ETF

The investment objective of the Schemes is to provide returns before expenses that closely correspond to the total return of the Underlying Index, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Nifty Next 50 Index Fund

The investment objective of the Scheme is to invest in companies whose securities are included in Nifty Next 50 TRI (the Index) and to endeavor to achieve the returns of the above index as closely as possible, though subject to tracking error. The Scheme will not seek to outperform the Nifty Next 50. The objective is that the performance of the NAV of the Scheme should closely track the performance of the Nifty Next 50 over the same period subject to tracking error. However, there is no assurance that the investment objective of the Scheme will be realized.

ICICI Prudential Sensex Index Fund

An open-ended index linked growth scheme seeking to track the returns of S&P BSE SENSEX TRI through investments in a basket of stocks drawn from the constituents of the above index. The objective of the Scheme is to invest in companies whose securities are included in S&P BSE SENSEX TRI and subject to tracking errors, to endeavor to achieve the returns of the above index as closely as possible. This would be done by investing in all the stocks comprising the S&P BSE SENSEX TRI in approximately the same weightage that they represent in S&P BSE SENSEX TRI. The Scheme will not seek to outperform the S&P BSE SENSEX TRI or to underperform it. The objective is that the performance of the NAV of the Scheme should closely track the performance of the S&P BSE SENSEX TRI over the same period. However, there can be no assurance that the investment objective of the Scheme will be realized.

ICICI Prudential Nifty Low Vol 30 ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index, subject to tracking errors. However, there can be no assurance that the investment objective of the scheme will be realized.

ICICI Prudential Alpha Low Vol 30 ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Sensex ETF

The investment objective of the "SPiCE" is to provide investment returns that, before expenses, closely correspond to the total returns of the securities as represented by the S&P BSE SENSEX. However, the performance of Scheme may differ from that of the underlying index due to tracking error. There can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

ICICI Prudential Midcap Select ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Midcap 150 ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

BHARAT 22 ETF

The investment objective of the Scheme is to invest in constituents of the underlying Index in the same proportion as in the underlying Index, and endeavor to provide returns before expenses, which closely correspond to the total returns of the underlying Index. However, the performance of the Scheme may differ from that of underlying index due to tracking error. There can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential S&P BSE 500 ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Nifty Next 50 ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Gold ETF

ICICI Prudential Gold ETF seeks to provide investment returns that, before expenses, closely track the performance of domestic prices of Gold derived from the LBMA AM fixing prices. However, the performance of the Scheme may differ from that of the underlying gold due to tracking error. There can be no assurance or guarantee that the investment objective of the Scheme will be achieved. The fund is not actively managed. It does not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by, changes in the price of gold.

ICICI Prudential Bank ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

Investment Objective of all the schemes

ICICI Prudential Private Banks ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential IT ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Quant Fund

To generate long-term capital appreciation by predominantly investing in equity and equity related instruments selected based on a quantitative model. However there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

ICICI Prudential Liquid ETF

The investment objective of the Scheme is to invest in CBLOs. The Scheme aims to provide returns before expenses that closely correspond to the returns of S&P BSE Liquid Rate Index, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential Healthcare ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential FMCG ETF

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total return of the underlying index subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ICICI Prudential PSU Bond plus SDL 40:60 Index Fund - Sep 2027

The investment objective of the scheme is to track the Nifty PSU Bond Plus SDL Sep 2027 40:60 Index by investing in AAA rated PSU bonds and SDLs, maturing on or before Sep 2027, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved and the scheme does not assure or guarantee any returns.

ICICI Prudential Regular Gold Savings Fund

ICICI Prudential Regular Gold Savings Fund (the Scheme) is a fund of funds scheme with the primary objective to generate returns by investing in units of ICICI Prudential Gold ETF (IPru Gold ETF). However, there can be no assurance that the investment objective of the Scheme will be realized.

There can be no assurance or guarantee that the investment objectives of the Scheme would be achieved.

Schedule 1: One Liner Definitions

Sharpe Ratio :

The Sharpe Ratio is a measure for calculating risk-adjusted return, It is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

Beta Ratio (Portfolio Beta) :

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

Macaulay Duration :

The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Modified Duration :

Modified Duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation :

Standard deviation is a measure of the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. It is applied to the annual rate of return of an investment to measure the investment's volatility.

Risk Free Return:

The rate of return attributed to an investment with zero risk. The risk-free rate represents the interest on an investor's money that would expect from an absolutely risk-free investment over a specified period of time.

Tracking Error:

A divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

Total Expense Ratio :

Total expense ratio is the percentage of net expenses that are charged by the fund. The net asset value of the fund is calculated after deducting total expense ratio.

Average Maturity :

Weighted Average Maturity of the assets.

Portfolio Yield (Yield To Maturity) :

Weighted Average valuation yield of the assets.

Average portfolio PE (Average P/E) :

It is price to earnings ratio of the stocks calculated for the entire portfolio on a weighted average basis.

Average portfolio price to book ratio (Average P/BV) :

It is price to book value of the stocks calculated for the entire portfolio on a weighted average basis.

Average portfolio dividend yield (Average Dividend Yield) :

It is dividend yield of the stocks calculated for the entire portfolio on a weighted average basis.

R Squared :

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

Portfolio Turnover :

Portfolio turnover is a measure of how frequently assets within a scheme are bought and sold. Portfolio turnover is calculated as the ratio of the lower value of purchase and sales, to the average net assets in the past one year (since inception for schemes that have not completed a year)

Growth and Cumulative option :

Growth and Cumulative words are used alternatively.

Schedule 2: How To Read Factsheet

Fund Manager :

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription :

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount :

This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity :

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP :

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV :

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark :

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load :

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1 %, the investor will enter the fund at Rs. 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load :

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs.100 and the exit load is 1%, the investor will receive Rs.99

Macaulay Duration :

The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Standard Deviation :

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio :

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta Ratio (Portfolio Beta) :

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

Average portfolio PE (Average P/E) :

It is price to earnings ratio of the stocks calculated for the entire portfolio on a weighted average basis.

Average portfolio price to book ratio (Average P/BV) :

It is price to book value of the stocks calculated for the entire portfolio on a weighted average basis.

Average portfolio dividend yield (Average Dividend Yield) :

It is dividend yield of the stocks calculated for the entire portfolio on a weighted average basis.

Net Equity :

Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

R Squared :

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

AUM :

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings :

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme :

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile :

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Value STP :

The ICICI Prudential Value STP is an innovation over the regular STP that enables you to take advantage of market fluctuations; you buy more units when the Net Asset Value (NAV) of your selected scheme falls and lesser units when the NAV rises. The Value STP helps you reach your targeted value for every transfer date, by adding or removing funds from your selected scheme.

Flex STP :

ICICI Prudential Transfer Plan ("Flex STP") is a facility wherein unit holder(s) of designated open-ended Scheme(s) of ICICI Prudential Mutual Fund can opt to transfer variable amount(s) linked to value of investments under Flex STP on the date of transfer at pre-determined intervals from designated open ended Scheme(s) of ICICI Prudential Mutual Fund [hereinafter referred to as "Transferor Scheme"] to the growth option of designated open-ended Scheme(s) of ICICI Prudential Mutual Fund [hereinafter referred to as "Transferee Scheme"].

Booster STP :

ICICI Prudential Booster Systematic Transfer Plan ("Booster STP") is a facility wherein unit holder(s) can opt to transfer variable amount(s) from designated open ended Scheme(s) of the Fund [hereinafter referred to as "Source Scheme"] to the designated open-ended Scheme(s) of the Fund [hereinafter referred to as "Target Scheme"] at defined intervals. The Unitholder would be required to provide a Base Installment Amount that is intended to be transferred to the Target Scheme. The variable amount(s) or actual amount(s) of transfer to the Target Scheme will be linked to the Equity Valuation Index (hereinafter referred to as EVI). The EVI is derived by assigning equal weights to Price to Earnings (PE), Price to book (PB), (G-Sec x PE) and Market Cap to Gross Domestic Product (GDP) or such other factors as may be determined by the AMC from time to time. For list of source and target schemes investors are requested to refer to application form.

Source Schemes: ICICI Prudential All Seasons Bond Fund, ICICI Prudential Banking & PSU Debt Fund, ICICI Prudential Bond Fund, ICICI Prudential Constant Maturity Gilt Fund, ICICI Prudential Corporate Bond Fund, ICICI Prudential Credit Risk Fund, ICICI Prudential Floating Interest Fund, ICICI Prudential Gilt Fund, ICICI Prudential Liquid Fund, ICICI Prudential Long Term Bond Fund, ICICI Prudential Medium Term Bond Fund, ICICI Prudential Money Market Fund, ICICI Prudential Overnight Fund, ICICI Prudential Savings Fund, ICICI Prudential Short Term Fund, ICICI Prudential Ultra Short Term Fund, ICICI Prudential Equity - Arbitrage Fund, ICICI Prudential Equity Savings Fund, ICICI Prudential Regular Savings Fund, ICICI Prudential Debt Management Fund (FOF) .
