QUICK TAKE

Markets do remain overvalued across the investment part of the economy and we may see normalisation in some of these segments.

We remain bullish on equities from a medium to long term perspective.

Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

KEY HIGHLIGHTS

MARKETS

Happy New Year from the entire team at Axis MF!

In December, equities initially showed gains, recovering some losses, but failed to maintain the momentum and ended lower. The BSE Sensex and Nifty 50 closed 2% down, while the NSE Midcap 100 rose by 1.4% and the NSE Smallcap 100 advanced 0.6%.

2024 remained promising for most of the year against a backdrop of general elections and union budget. However, the journey wasn't without its challenges. Elevated valuations, indices hitting lifetime highs, disappointing earnings growth, and persistent geopolitical tensions cast a shadow on the markets, causing a dip in October and November. Despite these challenges, the year ended on a high note. Equities rallied setting new records month after month. The Sensex soared past the 85,000 mark, while the Nifty 50 crossed 26,000. By year's end, the BSE Sensex had climbed 8.9%, the Nifty 9.6%, the Nifty Midcap 100 an impressive 23.4%, and the Nifty Smallcap 100 surged 23.9%.

After robust inflows of US\$20.7 bn in 2023, Foreign Portfolio Investors (FPIs) adopted a cautious stance in 2024, riding a financial see-saw. As election season approached, they pulled back, resulting in a US\$4 bn outflows. However, post-election optimism from June to September saw a resurgence, with inflows reaching US\$14 bn. This optimism was short-lived, as October and November witnessed another retreat, with outflows totaling US\$13.5 bn. Despite the volatility, FPI flows managed to stay just above water, ending the year with a modest net positive of US\$1.24 mn. In contrast, Domestic Institutional Investors (DIIs) played the perfect counterbalance to the FPIs, consistently adding inflows each month. The October-November outflows from FPIs were countered by a substantial US\$18 bn inflows from DIIs. By the end of the year, DIIs had amassed a total of ~US\$63 bn in inflows.

We believe that markets are gravitating towards companies with clear earnings growth visibility and a lower likelihood of significant earnings downgrades. Accordingly we believe the themes in 2025 are likely to be split into two halves.

In India, 2024 was a year of optimism albeit for most of the year but 2025 may bring more tempered expectations. We expect growth to remain moderate given the fiscal consolidation and slower credit growth. Many segments of the economy are showing signs of a slowdown given the higher base and this has translated into weaker corporate earnings. Companies have seen superior earning growth led by margin

improvement, strong recovery post Covid, along with government spending and policy actions. We believe factors like margin improvement may not continue for long, however continuation of prudent capital allocation policy by government to boost both capex and consumption, may drive earnings recovery. The strength of the US dollar coupled with stimulus measures in China have led to foreign fund outflows. However, these have been counterbalanced by the robust domestic fund inflows. Nonetheless, India remains one of the fastest-growing economies globally. The tariffs on China and other countries proposed by US President-elect could significantly impact global trade. However, during his first term, the tariffs on China benefited India, and this time, India might again be able to turn these trade restrictions into an opportunity.

It is pertinent to note that we begin 2025 after the strong rallies of 2023 and 2024, and elevated valuations thereof. Key events have caused volatility and rallies in equities. While our economy has been on a strong footing so far, equities are off the all-time highs and have seen a correction in the last three months. Yet valuations remain elevated. Going forward market performance could be influenced by earnings growth and absolute valuations. Given near-term growth challenges, likely muted foreign institutional investor (FII) inflows, and subdued earnings expectations, significant valuation expansion seems unlikely. We expect 2025 to be a year of stock picking across market caps. The recent corrections in mid and small caps could present opportunities to increase exposure to select stocks.

For the first half of 2025, key themes to watch include sectors such as Information Technology, Pharma, Quick Commerce, Capital Market beneficiaries, Travel/Tourism, Renewable Capex, Power Transmission & Distribution, EMS, Defense, and select Auto companies with new product launches on the horizon. However, many of these sectors currently have high valuations. By the second half of 2025, markets may shift focus to potential triggers in underperforming sectors such as Lenders, FMCG, and IT. Over the past three years, the capital goods sector has shown strong earnings growth, outperforming other sectors. After peaking in May 2024 and consolidating, it remains superior, especially as some consumption segments have weakened. Renewables, power transmission, defense orders, and electronics manufacturing drive demand. We expect select capex and PSU companies to perform well in 2025.

AXIS BLUECHIP FUND

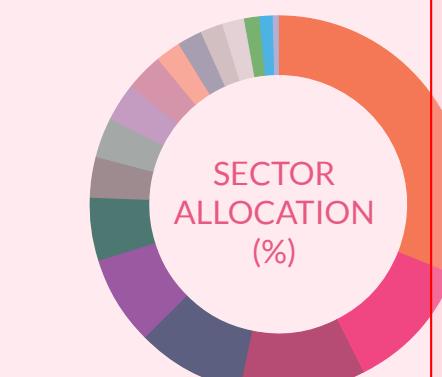

(An Open-Ended Equity Scheme Predominantly Investing In Large Cap Stocks)

FACTSHEET

December 2024

INVESTMENT OBJECTIVE: To achieve long term capital appreciation by investing in a diversified portfolio predominantly consisting of equity and equity related securities of Large cap companies including derivatives. There is no assurance that the investment objective of the Scheme will be achieved.

AXIS MIDCAP FUND

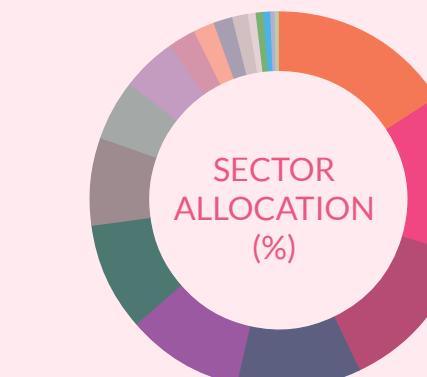

(An Open Ended Equity Scheme Predominantly Investing In Mid Cap Stocks)

FACTSHEET

December 2024

INVESTMENT OBJECTIVE: To achieve long term capital appreciation by investing predominantly in equity & equity related instruments of Mid Cap companies. There is no assurance that the investment objective of the Scheme will be achieved.

	DATE OF ALLOTMENT 18th February 2011
	BENCHMARK BSE 150 Midcap TRI
	PORTFOLIO TURNOVER (1 YEAR) 0.42 times

Period	(as on 31st December, 2024)					
	1 Year	3 Years	5 Years	Since Incep on	Date of Incep on	
	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-
Axis Midcap Fund - Regular Plan - Growth Option	29.73%	13,001	16.93%	15,994	23.01%	28,202
BSE 150 Midcap TRI (Benchmark)	26.55%	12,680	23.21%	18,715	28.54%	35,133
Nifty 50 TRI (Additional Benchmark)	10.00%	11,009	12.16%	14,114	15.52%	20,587
						19.02% 1,11,990 18-Feb-11

Past performance may or may not be sustained in future. Different plans have different expense structure. Shreyash Devalkar is managing the scheme since 23rd November 2016 and he manages 4 schemes of Axis Mutual Fund & Krishnaa N is managing the scheme since 3rd August 2023 and she manages 23 schemes of Axis Mutual Fund. Please refer to Annexure I on page 125 for performance of all schemes managed by the fund manager. Returns greater than 1 year period are compounded annualised (CAGR). Face Value per unit : ₹10.

Op ons	Record Date	IDCW (₹ Per unit)		Regular Plan	
		Individuals /HUF	Others	NAV per unit (Cum IDCW)	NAV per unit (Ex IDCW)
IDCW	Mar 20, 2024	3.10	3.10	-	38.34
	Feb 21, 2023	3.10	3.10	32.17	32.42
	Feb 28, 2022	3.10	3.10	34.90	31.80

Pursuant to payment of Distribution (or Income & Capital), the NAV of the above stated IDCW options of the scheme/plan would fall to the extent of payout and statutory levy, if any. Past performance may or may not be sustained in future. Face value of units is ₹10. IDCW means Income Distribution cum Capital Withdrawal.

ENTRY & EXIT LOAD	
Entry Load:	NA
Exit Load:	If redeemed / switched-out within 12 months from the date of allotment:For 10% of investments: Nil. For remaining investments: 1%. If redeemed / switched - out after 12 months from the date of allotment: NIL.

Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look slightly elevated on account of deployment during the first few days of the scheme. This effect is transitory in nature and normalizes as the fund completes 1 year since fund launch.

ENTRY & EXIT LOAD	
Entry Load:	NA
Exit Load:	0.25% if redeemed/ switched out within 7 days from the date of allotment/ Investment

Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitional in nature and normalizes as the fund completes 1 year since fund launch.

Note: Since the Scheme has not completed Six Months, performance details for the Scheme are not provided.

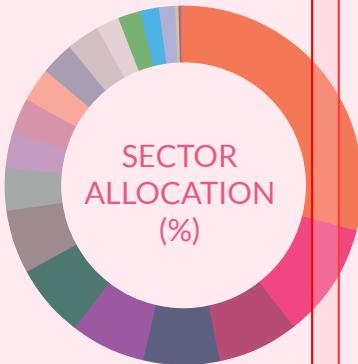

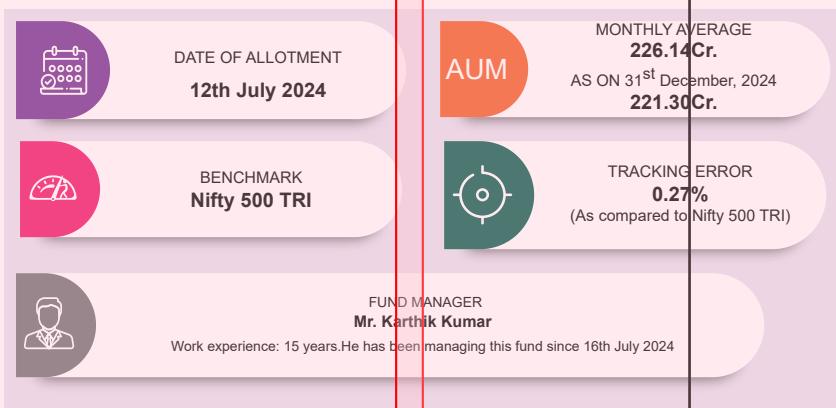

AXIS NIFTY 500 INDEX FUND

(An Open-Ended Index Fund tracking Nifty 500 TRI)

Exit Load: If redeemed / switched-out within 7 days from the date of allotment - 1% If redeemed / switched out after 7 days from the date of allotment: Nil

Subscriptions received in any form either lump-sum / switch-ins / fresh registration of Systematic Investment Plan (SIP) / Systematic Transfer Plan (STP) / existing SIP / STP or such other special product (where Axis NASDAQ 100 Fund of Fund and Axis US Treasury Dynamic Bond ETF Fund of Fund is the target scheme) are being temporarily suspended after the applicable cut off timing (i.e. 3:00 pm) on March 28, 2024 (Considering that March 29, 2024, March 30, 2024, March 31, 2024 being Non-Business days for the scheme).

FIXED INCOME OUTLOOK

JANUARY 2025

QUICK TAKE

- Expect lower interest rates in the last quarter of FY25.
- Investors should add duration with every rise in yields, as yield upside limited.
- Mix of 10-year maturity and 1-2-year maturity assets are best strategies to invest in the current macro environment.
- Selective Credits continue to remain attractive from a risk reward perspective given the improving macro fundamentals.

Happy New Year from the entire team at Axis MF!

Overall, yields ended lower globally in lieu of rate cuts. In the US, the yields on the 10 year Treasuries ended 31 bps lower while in India, yields on 10 year government bonds fell 43 bps in anticipation of action by the Reserve Bank of India (RBI). Heading in 2025, we anticipate several key themes to unfold: (a) US President Elect's America First policies to lead to stronger growth (b) slowing growth in the rest of the world, (c) weakness in China on account of tariffs measures imposed by the US (d) lower growth in India leading to rate cuts, and (e) tight liquidity conditions in India for most of the year unless the central bank intervenes or India benefits from forex inflows. To address these themes, we believe the central bank will cut rates by 50 basis points and that the RBI will employ additional liquidity tools such as OMO purchases, swap facilities, and VRR. Despite strong growth, we expect US inflation to settle at 2.5-2.8% and the US Federal Reserve (Fed) to lower rates by 50-75 bps in 2025.

Macro overview

US: The return of President elect introduces a new dimension to the US economy and the Fed policy. His 'America First' policies aim to boost domestic manufacturing and make the US an attractive investment destination by imposing tariffs on imports and restricting immigration. In the near term, these measures could lead to higher US inflation due to more expensive imports and potentially harm export-driven economies like China and Germany. We expect a wider fiscal deficit, a strong US dollar, and lower interest rates of 50-75 bps.

China: The world is closely monitoring China as the trade tariffs if imposed by the US could negatively impact China, particularly its export-driven growth. Additionally, the currency is expected to weaken against the US dollar. The government may introduce more stimulus measures through the year to stabilize the property market, increase investment, and stimulate consumption. However, a larger stimulus may be needed for a significant rebound in consumption. We expect the People's Bank of China to lower interest rates during the year, which would boost domestic demand but could further weaken the currency.

Commodities: 2024 was favorable for precious metals, with gold reaching record highs. We anticipate global oil prices to remain low, and although industrial metals began the year strongly, their rally eventually faded. Looking forward, we expect commodities to remain subdued. Additionally, actions taken by China and escalating geopolitical conflicts could influence commodity prices.

Rest of the world: A lot depends on the US policies that could impact countries to varying degrees. In Europe and the UK, we expect the focus to remain on growth and the central banks to follow further monetary policy easing. In contrast, headline inflation in Japan is expected to remain higher allowing the central bank of Japan to raise policy rates during the course of 2025.

Macro Outlook for India

We believe that fixed income markets will be in a sweet spot on account of various drivers as outlined below:

Growth: The three negative impulses for slower growth are (a) slowing credit growth, (b) fiscal consolidation (c) exports could be hit due to tariffs imposed by the US. However, we believe that growth could be in the range of 6.8% in FY25 and 6.4% in FY26. It is important to note here that the growth is coming off a high base and will still be positive and not expected to fall materially.

Inflation: Headline inflation has risen in the short term but is expected to stay around 4.5% next year, while core inflation has remained below 4% for over a year. We anticipate headline inflation to decrease further due to good rabi and kharif crop harvests and lower vegetable prices. Core inflation might see a slight increase due to rupee depreciation, but weaker commodities and slower growth are unlikely to cause major inflation surprises.

10 YEAR G-SEC YIELD
6.76%

Currency: Rupee has been a stellar performer for the last few years. However, it can see some near term depreciation on fears of (a) tariffs imposed by the US (b) strong US dollar (c) weak growth and (d) FPI outflows. Having said that, the rupee has done reasonably well compared to other emerging market countries and we do not expect significant depreciation hereon.

Banking Liquidity: We expect liquidity to remain in a tight range particularly in the first half of the year unless the central bank intervenes by way of OMO purchases or uses tools such as VRR/CRR. High seasonal growth in currency in circulation and continuous forex outflows would lead to banking liquidity to remain in deficit for most of the first half of 2025.

Fiscal Position: Despite the possibility of some tax measures to spur consumption we believe the government will adhere to its path of fiscal consolidation of 4.9% of GDP in FY25 and 4.5% in FY26. While slow growth can lead to some risks to revenue budgets, we do believe that government would like to continue to adhere to fiscal consolidation and do not see any major deviations in fiscal deficit for rating upgrades.

Favourable demand supply dynamics: Bond markets will continue to have favourable demand supply dynamics due to (a) fiscal consolidation to 4.9% and 4.5% thereof (b) real money AUM growth. (Real Money AAUM is defined as Insurance, pension fund and provident fund AAUM). Additionally, the dynamics would become more favourable due to the proposed change in Liquidity Coverage Ratio guidelines or the possibility of inclusion in Bloomberg indices that could result in probable fresh inflows of US\$20-25 billion.

Based on these themes, we believe that from February, every policy meeting will be an opportunity for a rate cut based on the below

- 1) By the next policy meeting, the central bank would have clarity on inflation and growth numbers to some extent
- 2) The Union Budget would be rolled out and if government continues on the path of fiscal consolidation, which we believe it would, monetary easing will be the likely outcome
- 3) The new President of the US would be sworn in on January 20, 2025, and by the time of our policy meeting, all the currency movements and market reactions would be priced in.

As growth at 6-6.5% continues to remain strong, we believe this cycle could be shallow and do not anticipate more than 50 bps of rate cuts in the next 6-12 months.

Risks to our view: The risks to our view at this point are as below

- 1) Currency and liquidity are the near-term problems. We remain slightly expensive on REER basis and hence can see some currency depreciation.
- 2) US political theme and Inflationary policies of the incoming government which can lead to a stronger US dollar.
- 3) China rebound can impact India in a vicious cycle of lower flows, weak growth and high inflation.

Strategy : We have been maintaining a higher duration across all our funds and guiding the rally in bonds since March 2024. We have already witnessed a more than 50 bps of rally in yields in 10-year bonds since the beginning of the year but positive demand-supply dynamics for government bonds and expected rate cuts will continue to keep bond markets happy, and we can expect another 20-25 bps of rally in the next 3-6 months. We believe that banking liquidity would be addressed somewhat in the Jan- March 2025 quarter due to CRR cuts but the RBI will have to do more to manage banking liquidity. Due to favourable demand supply dynamics, we continue to have a higher bias towards government bonds in our duration funds. Accordingly, from a strategy perspective, we have maintained an overweight duration stance within the respective scheme mandates with a higher allocation to Government bonds.

What should investors do?

- Investors should continue to hold duration across their portfolios.
- Incremental gains in long bonds would largely be post rate cuts.
- Directionally see yields for 10 year Gsec closer to 6.5% in next 6 months.
- In line with our core macro view, we continue to advise short- to medium-term funds with tactical allocation of gilt funds to our clients.

AXIS OVERNIGHT FUND

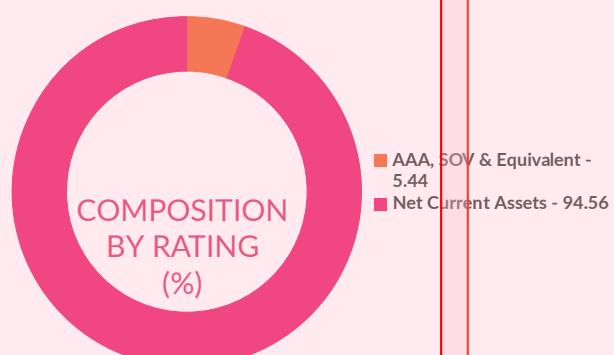

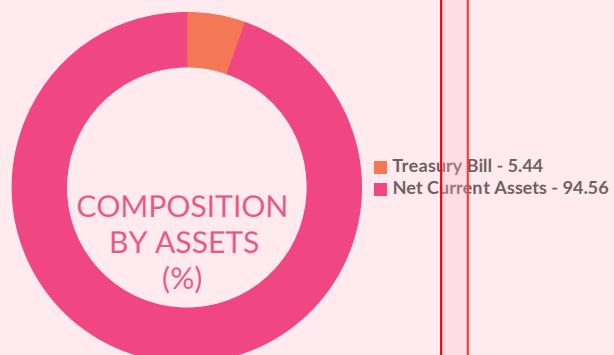

(An open-ended debt scheme investing in overnight securities. A relatively low interest rate risk and relatively low credit risk.)

FACTSHEET
December 2024

INVESTMENT OBJECTIVE: The investment objective of the Scheme is to provide reasonable returns commensurate with very low interest rate risk and providing a high level of liquidity, through investments made primarily in overnight securities having maturity/residual maturity of 1 business day. There is no assurance that the investment objective of the Scheme will be achieved.

AXIS TREASURY ADVANTAGE FUND

(An open ended low duration debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 6 to 12 months. A relatively high interest rate risk and moderate credit risk)

FACTSHEET
December 2024

INVESTMENT OBJECTIVE: The investment objective is to provide optimal returns and liquidity to the investors by investing primarily in a mix of money market and short term debt instruments which results in a portfolio having marginally higher maturity as compared to a liquid fund at the same time maintaining a balance between safety and liquidity. There is no assurance that the investment objective of the Scheme will be achieved.

HYBRID

OUTLOOK
₹ 
 JANUARY 2025

Quick Take - Equity

- Markets do remain overvalued across the investment part of the economy and we may see normalisation in some of these segments.
- We remain bullish on equities from a medium to long term perspective.
- Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

Quick Take - Fixed Income

- Expect lower interest rates in the last quarter of FY25.
- Investors should add duration with every rise in yields, as yield upside limited.
- Mix of 10-year maturity and 1-2-year maturity assets are best strategies to invest in the current macro environment.
- Selective Credits continue to remain attractive from a risk reward perspective given the improving macro fundamentals.

KEY HIGHLIGHTS

Happy New Year from the entire team at Axis MF!

In December, equities initially showed gains, recovering some losses, but failed to maintain the momentum and ended lower. The BSE Sensex and Nifty 50 closed 2% down, while the NSE Midcap 100 rose by 1.4% and the NSE Smallcap 100 advanced 0.6%.

2024 remained promising for most of the year against a backdrop of general elections and union budget. However, the journey wasn't without its challenges. Elevated valuations, indices hitting lifetime highs, disappointing earnings growth, and persistent geopolitical tensions cast a shadow on the markets, causing a dip in October and November. Despite these challenges, the year ended on a high note. Equities rallied setting new records month after month. The Sensex soared past the 85,000 mark, while the Nifty 50 crossed 26,000. By year's end, the BSE Sensex had climbed 8.9%, the Nifty 9.6%, the Nifty Midcap 100 an impressive 23.4%, and the Nifty Smallcap 100 surged 23.9%.

Overall, yields ended lower globally in lieu of rate cuts. In the US, the yields on the 10 year Treasuries ended 31 bps lower while in India, yields on 10 year government bonds fell 43 bps in anticipation of action by the Reserve Bank of India (RBI). Heading in 2025, we anticipate several key themes to unfold: (a) US President Elect's America First

policies to lead to stronger growth (b) slowing growth in the rest of the world, (c) weakness in China on account of tariffs measures imposed by the US (d) lower growth in India leading to rate cuts, and (e) tight liquidity conditions in India for most of the year unless the central bank intervenes or India benefits from forex inflows. To address these themes, we believe the central bank will cut rates by 50 basis points and that the RBI will employ additional liquidity tools such as OMO purchases, swap facilities, and VRR. Despite strong growth, we expect US inflation to settle at 2.5-2.8% and the US Federal Reserve (Fed) to lower rates by 50-75 bps in 2025.

Equity Market View:

After robust inflows of US\$20.7 bn in 2023, Foreign Portfolio Investors (FPIs) adopted a cautious stance in 2024, riding a financial see-saw. As election season approached, they pulled back, resulting in a US\$4 bn outflows. However, post-election optimism from June to September saw a resurgence, with inflows reaching US\$14 bn. This optimism was short-lived, as October and November witnessed another retreat, with outflows totaling US\$13.5 bn. Despite the volatility, FPI flows managed to stay just above water, ending the year with a modest net positive of US\$124 mn. In contrast, Domestic Institutional Investors (DIIs) played the perfect counterbalance to the FPIs, consistently adding inflows

KEY HIGHLIGHTS

each month. The October-November outflows from FPIs were countered by a substantial US\$18 bn inflows from DIIs. By the end of the year, DIIs had amassed a total of ~US\$63 bn in inflows.

We believe that markets are gravitating towards companies with clear earnings growth visibility and a lower likelihood of significant earnings downgrades. Accordingly we believe the themes in 2025 are likely to be split into two halves.

It is pertinent to note that we begin 2025 after the strong rallies of 2023 and 2024, and elevated valuations thereof. Key events have caused volatility and rallies in equities. While our economy has been on a strong footing so far, equities are off the all-time highs and have seen a correction in the last three months. Yet valuations remain elevated. Going forward market performance could be influenced by earnings growth and absolute valuations. Given near-term growth challenges, likely muted foreign institutional investor (FII) inflows, and subdued earnings expectations, significant valuation expansion seems unlikely. We expect 2025 to be a year of stock picking across market caps. The recent corrections in mid and small caps could present opportunities to increase exposure to select stocks.

For the first half of 2025, key themes to watch include sectors such as Information Technology, Pharma, Quick Commerce, Capital Market beneficiaries, Travel/Tourism, Renewable Capex, Power Transmission & Distribution, EMS, Defense, and select Auto companies with new product launches on the horizon. However, many of these sectors currently have high valuations. By the second half of 2025, markets may shift focus to potential triggers in underperforming sectors such as Lenders, FMCG, and IT. Over the past three years, the capital goods sector has shown strong earnings growth, outperforming other sectors. After peaking in May 2024 and consolidating, it remains superior, especially as some consumption segments have weakened. Renewables, power transmission, defense orders, and electronics manufacturing drive demand. We expect select capex and PSU companies to perform well in 2025.

Debt Market View:

We believe that fixed income markets will be in a sweet spot on account of various drivers as outlined below:

Growth: The three negative impulses for slower growth are (a) slowing credit growth, (b) fiscal consolidation (c) exports could be hit due to tariffs imposed by the US. However, we believe that growth could be in the range of 6.8% in FY25 and 6.4% in FY26. It is important to note here that the growth is coming off a high base and will still be positive and not expected to fall materially.

Inflation: Headline inflation has risen in the short term but is expected to stay around 4.5% next year, while core inflation has remained below

4% for over a year. We anticipate headline inflation to decrease further due to good rabi and kharif crop harvests and lower vegetable prices. Core inflation might see a slight increase due to rupee depreciation, but weaker commodities and slower growth are unlikely to cause major inflation surprises.

Currency: Rupee has been a stellar performer for the last few years. However, it can see some near term depreciation on fears of (a) tariffs imposed by the US (b) strong US dollar (c) weak growth and (d) FPI outflows. Having said that, the rupee has done reasonably well compared to other emerging market countries and we do not expect significant depreciation hereon.

Banking Liquidity: We expect liquidity to remain in a tight range particularly in the first half of the year unless the central bank intervenes by way of OMO purchases or uses tools such as VRR/CRR. High seasonal growth in currency in circulation and continuous forex outflows would lead to banking liquidity to remain in deficit for most of the first half of 2025.

Fiscal Position: Despite the possibility of some tax measures to spur consumption we believe the government will adhere to its path of fiscal consolidation of 4.9% of GDP in FY25 and 4.5% in FY26. While slow growth can lead to some risks to revenue budgets, we do believe that government would like to continue to adhere to fiscal consolidation and do not see any major deviations in fiscal deficit for rating upgrades.

Favourable demand supply dynamics: Bond markets will continue to have favourable demand supply dynamics due to (a) fiscal consolidation to 4.9% and 4.5% thereof (b) real money AUM growth. (Real Money AAUM is defined as Insurance, pension fund and provident fund AAUM). Additionally, the dynamics would become more favourable due to the proposed change in Liquidity Coverage Ratio guidelines or the possibility of inclusion in Bloomberg indices that could result in probable fresh inflows of US\$20-25 billion.

Based on these themes, we believe that from February, every policy meeting will be an opportunity for a rate cut based on the below

- 1) By the next policy meeting, the central bank would have clarity on inflation and growth numbers to some extent
- 2) The Union Budget would be rolled out and if government continues on the path of fiscal consolidation, which we believe it would, monetary easing will be the likely outcome
- 3) The new President of the US would be sworn in on January 20, 2025, and by the time of our policy meeting, all the currency movements and market reactions would be priced in.

As growth at 6-6.5% continues to remain strong, we believe this cycle could be shallow and do not anticipate more than 50 bps of rate cuts in the next 6-12 months.

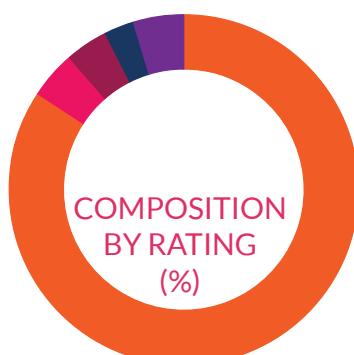

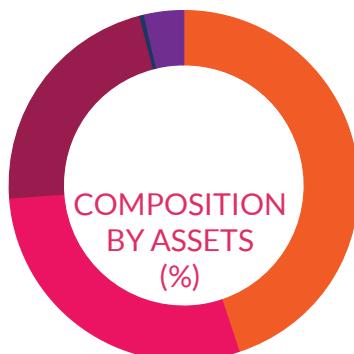

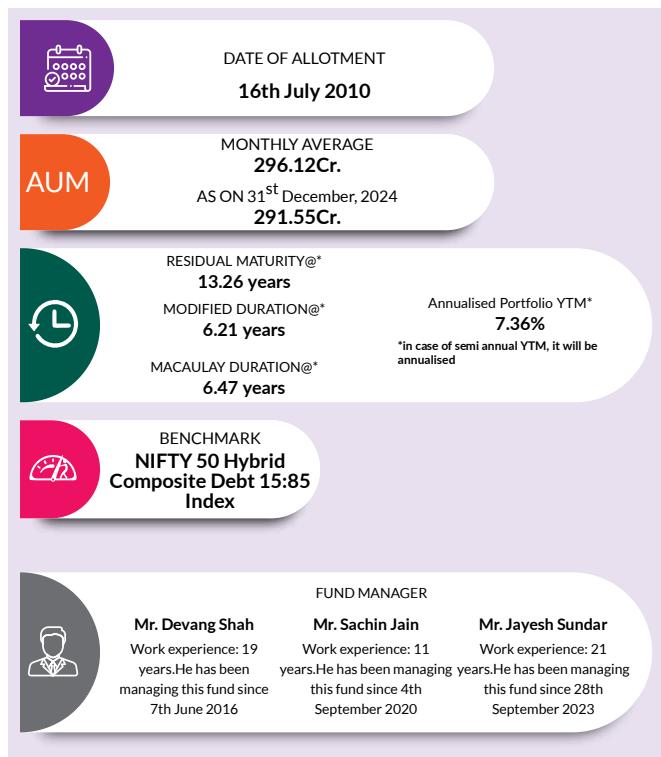

AXIS CONSERVATIVE HYBRID FUND

(An open ended hybrid scheme investing predominantly in debt instruments)

FACTSHEET

December 2024

INVESTMENT OBJECTIVE: The scheme seeks to generate regular income through investments in debt & money market instruments, along with capital appreciation through limited exposure to equity and equity related instruments. It also aims to manage risk thorough active asset allocation. There is no assurance that the investment objective of the Scheme will be achieved.

Please refer to the website for current load structure. For complete information refer key information memorandum (KIM) and Scheme Information document (SID).
In Axis Overnight Fund and Axis Liquid fund, Daily & Weekly SIP facility is available. **The benchmark of Axis Multi Asset Allocation Fund is Nifty 500 TRI (65%) + Nifty Composite Debt Index (20%) + Domestic Price of Physical Gold (7.5%) + Domestic Price of Physical Silver (7.5%) pursuant to change in fundamental attribute which was effective from April 27, 2023. Investors are requested to note that Domestic Price of Silver available from September 2022 since the inception of Axis Silver ETF. Hence, the existing benchmark for comparing with scheme returns is placed, once we start building the data for silver, we will keep updating the returns with revised benchmark.
