About The Fund
Date of Inception: 12-Jun-07

OBJECTIVE: To provide long term capital appreciation by actively managing a well-diversified equity portfolio of fundamentally strong blue chip companies. Further, the fund seeks to provide a cushion against the sudden volatility in the equities through some investments in short term money market instruments.

STRATEGY: To build and actively manage a well-diversified equity portfolio of value and growth driven stocks by following a research focused investment approach. While appreciating the high risk associated with equities, the fund would attempt to maximize the risk-return pay off for the long-term advantage of the policyholders. The fund will also explore the option of having exposure to quality mid cap stocks. The non-equity portion of the fund will be invested in good rated (P1/A1 & above) money market instruments and fixed deposits. The fund will also maintain a reasonable level of liquidity.
