How to read the Factsheet

Date of Allotment

The date on which units are allotted to investors following a New Fund Offer (NFO).

Fund Manager

An employee of the Asset Management Company (AMC) who is responsible for managing the fund.

Assets Under Management (AUM)

The total value of investments that the AMC manages in a specific fund.

Minimum Application Amount

The minimum amount that a new investor must subscribe when investing in the fund.

Additional Purchase Amount

The amount applicable when an existing investor wants to invest more money, beyond the initial investment.

Total Expense Ratio (TER)

The percentage of the AUM charged by the AMC to cover investment and operational expenses.

SIP

Systematic Investment Plan (SIP) is an organized way of investing in Mutual Fund by investing at pre-defined intervals ranging from daily, weekly, monthly and quarterly.

NAV

Net asset value or NAV is the value per unit of the fund held by investor as on the date of investments net of expenses by total units of the fund. An investor will enter and exit the fund based on the NAV.

Benchmark

Typically refers to an index, whose performance is used as a standard or benchmark for the fund. Examples include Nifty 50, Sensex, BSE 200, BSE 500, and 10-year Gsec.

Exit load

When an investor redeems mutual fund units within a specified period, exit load is charged on the units redeemed.

Asset allocation and holdings

Details of investments made by the fund in multiple securities classified by rating and sector.

Rating

Rating refers to grading of a company provided by registered rating agencies based on the highest safety followed by AA, A and BBB.

Macauley Duration

Macauley Duration is a measure of how long it takes for the price of a bond to be paid back to the investor.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a 1% change in interest rates.
