Direct plan. Returns: for more than 1 year are annualized (CAGR). Past performance may or may not be sustained in the future. Source: Ace MF & qGR as on 31-Aug-2026.

## No. of Schemes that Outperformed the Benchmark of quant MF Equity & Hybrid Schemes

A scheme counts as outperforming when its own return exceeds its benchmarks over the same period, each scheme against its own benchmark. Only schemes with a record for that period are counted, so the denominator falls as the horizon lengthens. Direct plan. Returns: for more than 1 year are annualized (CAGR). Past performance may or may not be sustained in the future. Source: Ace MF & qGR as on 31-Aug-2026.

## ***Gold & Silver remind the world that 40 trillion matters more than 1 trillion!***

In August, we at quant Mutual Fund introduced **two significant firsts; the launch of our first ETF, quant Silver Exchange Traded Fund, and our first FOF, quant Income Plus Arbitrage Active Fund of Funds**. Both launches reflected our conviction that timing matters; not only in investing, but also in bringing the right investment opportunities to investors. While the Silver ETF offers convenient exposure to silver, the Income Plus Arbitrage Active FOF combines debt-oriented and arbitrage mutual fund schemes, with no allocation to Credit Risk schemes, to offer a potentially more tax-efficient fixed-income experience for investors seeking an alternative to traditional fixed deposits, while being mindful that returns are market-linked and not assured.

Through August 2026, global markets and economic policy navigated persistent **geopolitical shocks, surging sovereign yields, and blockbuster artificial intelligence earnings**. Amid the on-again, off-again West Asian conflict and U.S. naval blockades, Iran resumed direct negotiations with Oman late August to discuss restoring safe navigation through the Strait of Hormuz. Most lately, U.S. forces carried out precise strikes near Larak Island in the strait, prompting retaliatory regional drone and missile interceptions. Nevertheless, numbly, global equity indices traded largely flat through August. The Nifty 50 Index corrected 1.2%, though broader markets posted marginal gains. **Bitcoin, Silver and Gold rang out loud through August, gaining 25%, 15% and 10%, respectively.**

Elevated crude oil and fertilizer import costs are threatening the anticipated central bank monetary easing cycles across developing Asian economies. The burgeoning **US debt at \$40 trillion** has again taken center stage within the global capital market narrative, especially after the **US Treasury announced more than doubling the maximum debt buyback** for longer-dated securities (10-30 years) to at least \$4 billion per operation. It is obvious that the action is an attempt to cool the **sharp rise in long-term bond yields, such as the 30-year bond yield, which rose to 5.33%, a level last seen at the turn of the 21<sup>st</sup> century in 2000**, after hitting an all-time low of ca. 1% during covid. Global sovereign bond yields also hit multi-decade highs, with 30-year treasury bond yields spiking also in Germany and Japan.

At the 2026 Jackson Hole Economic Policy Symposium, Federal Reserve Chair Kevin Warsh delivered a hawkish debut keynote. He stated that **underlying inflation trends have not “Meaningfully improved”** and remain above the central bank’s 2% target. He signaled that the Fed “Has work to do” and remains open to raising interest rates if price stability is not clearly achieved. **The hawkish tone immediately altered market expectations**, with traders pushing the odds of a 25-basis-point interest rate hike at the September FOMC meeting, to now over 68% from under 40% just a week ago.

Regardless of intensely adverse geopolitical developments and increased indebtedness, the tech world continues to drive its own agenda, and the quarterly earnings delivered a succor to tech investors amid growing skepticism over growth capex. **The world’s primary “Hyperscalers”—Amazon, Alphabet, Meta, and Microsoft—collectively spent over \$1 trillion on AI infrastructure since 2023, and their combined global investments in capex is projected to exceed \$1 trillion annually between 2026 and 2027.** As Nvidia unveiled a \$500 billion AI infrastructure financing deal, it posted a massive beat in earnings with a revenue growth guidance of 70%. Amazon and Microsoft delivered massive cloud re-accelerations during the early August reporting window. Microsoft Azure growth hit 43% following massive enterprise adoption, while Amazon Web Services grew at 37%, marking its fastest clip in 18 quarters.

In India, however, the lack of exposure to AI and over-dependence on high ticket imports such as Oil and Gold has impacted sentiments at a broader level. That said, we believe that **the upcoming decade belongs to India and global capital will continue to find India a most favourable destination**. Latest earnings season has also highlighted strong growth and profitability trend in India’s corporates. Driven by robust domestic demand factors such as those of discretionary consumption, banking, real estate and industrials, profit growth in Q1 FY27 for the Nifty, Nifty Next50 and Nifty Midcap indices was quite healthy at 14%, 27% and 38%, excluding oil marketing companies.

In such times when large global indices such as crude, and even stock market indices of entire countries such as Taiwan and South Korea behave like nano-cap stocks, it is **important to stay agile in one’s own portfolio and allocation. This is where the vitality of quant’s dynamic and active style of money management** comes to the fore. Our multi asset, multi manager structure allows us to act swiftly and capture value across a broad swathe of asset classes efficiently under various investment scenarios.

Over a period of time, we expect market consolidation trends to become entrenched in the large cap and blue-chip segments of the market. In such an environment, alpha generation will be driven by bottom-up stock-specific opportunities within the micro, small, and mid-cap sectors. **Our Predictive Analytics framework showcased its cross-asset capabilities by preempting sharp movements in Copper and WTI crude in the recent months, generating outsized returns.** Despite an apparently conducive environment, crude has largely stalled after we mentioned last month that it can see a gradual correction over the next few months – another prescient insight of quant’s Predictive Analytics.

In 2020, when the whole world was captured and enamored with ESG, this crowded trade was understood by us, and an anti-ESG strategy—which worked very well for our benefit—was deployed in our portfolio. Since April, 2026, the noise about how AI is the biggest thing has been surrounding us from all directions. Our **Behavioral Analytics is now identifying opportunities in the anti-AI trade**, and India, in general, being away from the crowded trade of 2026 of AI, is poised to outperform. Our portfolio construction is focused on under-owned, under-researched, under-valued and neglected territory stocks. We are relatively underweight **manufacturing** companies because of uncertainty related to input costs and supply chains. We have increased our exposure towards **IT Services** companies, as they were entering neglected territory. We continue to remain constructive on **Energy, large Infrastructure, select NBFCs, AMCs, Auto Ancillaries, Hotels, Pharmaceuticals, Telecom and data center themes.**

We are deeply grateful for your continued trust and partnership over the years. Your long-term financial success remains our highest priority, and we look forward to supporting your wealth-building journey.

However, different plans have different expense structure. Past performance may not be indicative of future performance.

# How to Read Factsheet?

## INVESTMENT OBJECTIVE

The investment objective of a fund describes its purpose and goals, outlining the intended outcomes for investors. It typically specifies the type of securities the fund will invest in and whether the objective is capital appreciation, income generation, preservation of capital, or a combination thereof. Understanding the fund's objective is crucial for investors to evaluate whether the fund's strategy resonates with their own financial objectives.

## INCEPTION DATE

The inception date marks the starting point from which the fund's performance and history are measured. It is important for investors because it provides insight into the fund's track record, allowing them to assess historical performance and other key metrics since inception.

## CONTRIBUTION BY MARKET CAP

Market capitalization (commonly known as market cap) is calculated by multiplying a company's outstanding shares by its stock price per share.

The contribution by market cap indicates the proportion of the fund's assets invested in companies of different sizes, typically categorized into:

- Large-cap: Top 100 listed companies based on previous 6 month average market cap.
- Mid-cap: Next 150 listed companies based on previous 6 month average market cap.
- Small-cap: All companies beyond top 250 listed companies based on previous 6 month average market cap.

Fund's allocation towards different market capitalization is subject to its allocation limits as specified in the Scheme Investment Document (SID). Moreover, this allocation also underscores the fund's prevailing investment strategy, which is influenced by the risk-off/risk-on dynamics observed across various market cycles.

## PORTFOLIO CONCENTRATION

This data helps in understanding the extent to which the fund's assets are invested in a limited number of securities (commonly known as portfolio concentration). It indicates how diversified or concentrated the portfolio is.

The level of portfolio concentration can impact the fund's risk and return profile. A concentrated portfolio may offer the potential for higher returns if the selected securities perform well, but it also carries higher risks due to the lack of diversification. On the other hand, a diversified portfolio aims to reduce risk by spreading investments across different securities, potentially mitigating the impact of poor performance from any single security; however, it may also limit the potential for outsized returns if a particular sector or security experiences significant growth.

## INVESTOR CONCENTRATION

Investor concentration refers to the distribution of Money under Management (MuM) among the fund's investors. It's essentially the extent to which the fund's MuM is held by a relatively small number of investors versus being spread across a larger investor base.

## **MONEY MANAGERS**

Money managers are experienced professionals with expertise in financial markets, securities analysis, and portfolio management. Their knowledge and skills are essential for selecting suitable investments, managing risk, and optimizing returns for investors.

They are tasked with constructing and rebalancing the fund's portfolio to achieve its investment objectives. They decide which securities to buy, hold, or sell based on market conditions, economic trends, and the fund's strategy.

## **BENCHMARK INDEX**

Benchmark indices serve as reference points for investors, providing a standard against which they can evaluate a fund's performance. These indices represent specific market segments or asset classes and act as benchmarks for measuring the relative success of funds. Comparing a fund's performance to its benchmark index helps investors gauge how effectively the fund's manager has achieved investment objectives and managed risk.

## **RISKOMETER**

The risk-o-meter is a standardized tool depicted through a pictorial meter implemented by market regulators to quantify the level of risk associated with investing in a particular fund. It is typically graphic representation which ranks funds on a scale from low to very high risk namely (i) low risk (ii) low to moderate risk (iii) moderate risk (iv) moderately high risk (v) High risk and (vi) very high risk, helping investors assess the risk profile of a fund before investing. By understanding the risk level indicated by the risk-o-meter, investors can align their investment decisions with their risk tolerance and financial goals, ensuring they select funds that match their preferences for risk and return.

## **PORTFOLIO TOP HOLDING**

The Top Holding in a fund refers to the fund's largest investment holdings, typically representing the highest allocation of assets within the portfolio. For investors, understanding the top holdings is crucial as it provides insight into the fund's investment strategy and the sectors or companies the money manager believes offer the most potential. By knowing the top holdings, investors can assess the fund's diversification, concentration, and alignment with their own investment objectives. Monitoring changes in Top Holdings over time can also reveal shifts in the money manager's strategy or market trends.

## **RELATIVE WEIGHTAGE**

This graph represents how the fund's sectoral exposure differs from the market benchmark. By identifying over- or underweight sectors, investors can gauge the money manager's active decisions and provide insights into the money manager's sectoral preferences, deviations from the benchmark, and potential sources of outperformance or underperformance. This data helps to evaluate the fund's positioning and sector rotation strategy.

## **EXIT LOAD**

Exit load refers to a fee charged by the fund when an investor redeems or sells their units within a specified period after purchasing them. This fee is designed to discourage short-term trading and to cover administrative costs associated with processing redemptions. Exit loads are typically expressed as a percentage of the redeemed amount and vary depending on the scheme and the duration for which the investment was held. Investors should be aware of exit loads before investing as they can affect the overall returns, especially for short-term investments.

## SCHEME PERFORMANCE

By providing the funds' historical performance data, a clear picture is obtained of how the fund has fared in the market across time frames. In line with the SEBI Regulations, fund fact sheet discloses the scheme performance for the 1-year, 3-year, 5-year period and from the scheme inception date. Further, the performance of the benchmark index (Total Return Index) is also shared along with the scheme performance for ease of comparison by the investors. The scheme performance for the period longer than one year is disclosed in CAGR (Compounded Annual Growth Returns) terms.

## SIP RETURNS

SIP returns refer to the returns generated by investing through a systematic investment plan. SIP is a method of investing a fixed amount regularly, into a mutual fund scheme. SIP returns reflect the compounded growth of investments made through SIP over a specific period. Since SIP involves investing fixed amounts at regular intervals, it helps investors benefit from rupee-cost averaging and may potentially reduce the impact of market volatility on their investments.

## RISK-ADJUSTED MEASURES

A metric, such as standard deviation, portfolio beta, and portfolio turnover ratio, when considered in isolation, does not provide a comprehensive depiction of a fund's returns and risk profile. Risk and risk-adjusted return metrics, like Sharpe Ratio, Sortino Ratio, Jensen's Alpha, Upside and Downside Deviation, and Upside Capture and Downside Capture Ratios, when looked at together provide a more comprehensive assessment of risk-adjusted performance thereby offering a clearer picture of a fund's overall performance, risk profile and the fund's ability to outperform benchmarks.

### 1. Standard Deviation

Standard deviation measures the dispersion of returns around the mean, assuming a normal distribution of returns. It is a good measure of total return dispersion, but the drawback is that it treats positive and negative deviations identically. It explains the magnitude of volatility but a high standard deviation does not necessarily mean higher downside risk. Reporting it as the sole volatility measure therefore does not distinguish between favourable upside volatility and adverse downside volatility. Two funds can consequently show the same standard deviation despite having materially different downside-risk profiles. Established analytics frameworks separately recognise downside deviation for precisely this reason. For investors, relying only on standard deviation will not help in understanding the important distinction between overall variability and actual downside risk. Investors should also look at other portfolio risk measures like upside capture, downside capture, skewness, expected shortfall, drawdowns and recovery duration.

### 2. Sharpe Ratio

William F. Sharpe's definitive formula defines the Sharpe Ratio using the period-by-period differential return — fund return less the corresponding risk-free return — and divides its average by the standard deviation of those same differential returns.<sup>1</sup> Sharpe specifically states that it is essential to use both the mean and standard deviation of the differential return otherwise, the ratio loses its intended economic meaning.

The AMFI-defined methodology is inconsistent in both the numerator and denominator with the actual formula. It subtracts an annualized total return earned over three years with a risk-free rate observed on the last day (a single point in time). This yields an excess return that is representative of neither annualized excess return nor an excess return at a point in time. As risk-free rates have changed over the period, the excess returns will vary. The resulting Sharpe Ratio can not only increase or decrease solely because of the rate prevailing on the reporting date but also the standard deviation of portfolio returns will be different from the standard deviation of excess returns. This distorts both absolute interpretation and comparison between schemes.

1. <https://web.stanford.edu/~wfsarpe/art/sr/sr.htm>

### 3. Beta

Portfolio beta is a measure of the systematic risk of a portfolio of securities relative to a market benchmark. The AMFI-defined methodology calculates beta using three years of historical monthly scheme and benchmark returns. This measures the scheme's average historical sensitivity over that period; however, it does not measure the market sensitivity of the portfolio held. Where portfolio positioning has changed, different portfolio regimes are averaged together, and the reported beta can therefore differ materially from the risk embedded in the current holdings of the respective schemes.

This results in schemes with similar historical NAV-based betas being presented as having similar market risk despite holding materially different securities, concentrations, factor exposures, hedges and directional exposures. Conversely, a holdings-based portfolio beta derived from current portfolio weights and the covariance of the underlying securities with the benchmark directly reflects these differences and therefore provides materially more accurate information on current portfolio risk.

Further, standard CAPM-based return beta is estimated using fund and benchmark excess returns over the risk-free rate, rather than unadjusted returns, so that beta measures sensitivity to the risky market component. Using raw returns allows movements in the risk-free rate and benchmark to remain embedded in both series, so part of the measured covariance reflects changes in the common risk-free component and the benchmark rather than the fund's sensitivity to market risk.

Finally, an equal-weight three-year covariance gives an observation from three years ago the same importance as a recent observation. This can make the estimate slow to reflect changes in market volatility and correlations. The exponentially weighted covariance method places greater importance on recent observations and is therefore more responsive to the market regime relevant to the portfolio at the reporting date.

We also report an EWMA holdings-based portfolio beta. Individual security betas are estimated against the NIFTY 500 TRI, with the portfolio beta derived from their weighted exposures. A common broad-market benchmark was deliberately used so that beta measures systematic market risk rather than sensitivity to potentially narrower, scheme-specific benchmarks. This provides a consistent beta for each security across portfolios and makes the resulting portfolio betas and therefore systematic-risk estimates comparable across schemes. This can be found in the fund commentary at the start of each scheme.

### 4. Portfolio Turnover Ratio

Portfolio Turnover Ratio, when viewed in isolation, provides limited information on either portfolio quality or the effectiveness of active management. It provides no meaningful information about the portfolio's ability to generate returns or manage risk. A high turnover ratio does not by itself indicate excessive risk or poor investment discipline, just as a low ratio does not necessarily indicate superior portfolio management. It can also be materially influenced by mechanical activity such as rolls, maturities, liquidity management and other transactions that do not represent a new investment decision.

Actively managed funds globally will naturally have higher turnover ratios as they dynamically rebalance their portfolio based on Risk-On or Risk-Off environment. Investors should focus on other performance metrics, risk factors such as risk-adjusted return

## quant Small Cap Fund

quant Small Cap Fund is for the investors with a long-term investment horizon and a high risk appetite. Majority of portfolio is invested in high growth companies with attractive valuations and relative under-ownership. During August 2026, exposure to Healthcare (+1.52%) and Telecom (+1.24%) was raised while Power (-0.86%), Capital Goods (-0.64%) and Metals (-0.49%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.54**

| AUM (31 August 2026):        | Rs. 35,557.21 Cr       |
| AAUM (31 August 2026):       | Rs. 35,039.58 Cr       |

### Fund Manager Details

|                       |                  |
|-----------------------|------------------|
| Name of Fund Manager: | Sandeep Tandon   |
| Total Experience:     | 33 Years         |
| Managing Since:       | 03 February 2025 |
| Name of Fund Manager: | Sameer Kate      |
| Total Experience:     | 31 Years         |
| Managing Since:       | 06 March 2025    |
| Name of Fund Manager: | Sanjeev Sharma   |
| Total Experience:     | 20 Years         |
| Managing Since:       | 03 October 2019  |
| Name of Fund Manager: | Ankit Pande      |
| Total Experience:     | 16 Years         |
| Managing Since:       | 10 May 2020      |
| Name of Fund Manager: | Yug Tibrewal     |
| Total Experience:     | 8 Years          |
| Managing Since:       | 06 March 2025    |
| Name of Fund Manager: | Varun Pattani    |
| Total Experience:     | 5 Years          |
| Managing Since:       | 03 February 2025 |
| Name of Fund Manager: | Ayusha Kumbhat   |
| Total Experience:     | 3 Years          |
| Managing Since:       | 19 February 2025 |

### Minimum Investment

|                  |      |
|------------------|------|
| Lump sum Amount: | 5000 |
| SIP Amount:      | 1000 |

### Load Structure

**Exit Load if any:**  
For redemptions / switch outs (including SIP/STP) within 1 year from the date of allotment of units, irrespective of the amount of investment: 1%. No exit load shall be applicable on switches from Regular Plan to Direct Plan and vice versa, under the same scheme.

### Expense Ratio

|               |       |
|---------------|-------|
| Regular Plan: | 1.76% |
| Direct Plan:  | 0.94% |

### Fund Performance:

#### Performance of scheme in Tabular form

| Compounded Annualised Returns | Scheme Returns % - Regular | Scheme Returns % - Direct | Benchmark Returns % |
|-------------------------------|----------------------------|---------------------------|---------------------|
| Returns for last 1 year       | 17.76%                     | 18.78%                    | 0.12%               |
| Returns for last 3 year       | 17.18%                     | 18.25%                    | 0.16%               |
| Returns for last 5 year       | 19.32%                     | 20.69%                    | 0.17%               |
| Returns since inception       | 11.96%                     | 17.82%                    | 0.16%               |

#### Absolute Returns for each F.Y. for last 5 years

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant ELSS Tax Saver Fund

quant ELSS Tax Saver Fund is constructed from the long-term perspective and is suited for investors with long-term investment horizon. Investors can enjoy triple benefits of equity participation, lowest lock-in period and tax savings. Currently, the portfolio is skewed towards large caps and we intend retain the large cap bias. Given the benefits of some of the longer-term themes such as those of financialization, energy, auto, infrastructure over a substantial period of time, we align our portfolio towards such sectors. During August 2026, exposure to Financial Services (+2.45%), Healthcare (+1.88%), Oil & Gas (+1.88%) and Auto (+1.07%) was increased while IT (-8.23%) and Chemicals (-1.33%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.53**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Mid Cap Fund

quant Mid Cap Fund is an equity-oriented strategy that predominantly invests in mid-cap companies with strong growth potential across both medium and long-term horizons. The portfolio is designed to capture the dynamism, innovation, and earnings momentum that define the mid-cap universe. During August 2026 exposure to Healthcare (+7.00%), Capital Goods (+4.12%) and Auto (+3.76%) increased while Financial Services (-4.04%) and IT (-1.96%) were reduced. Mid-caps are in a favourable phase supported by improving fundamentals. The fund seeks to deliver superior capital appreciation through disciplined stock selection and active risk management. **EWMA Holdings-based portfolio beta (equity): 0.43**

| Since Inception | 1640000                 | 3060000 | 6564812            | 22308988 | 18.56          | 13.28   | 6818450            | 19.04            | 3907412            | 11.88            |

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Flexi Cap Fund

quant Flexi Cap Fund offers maximum flexibility to invest across sectors and market capitalisations, enabling broad diversification and strategic participation in evolving market cycles. Designed for investors seeking dynamic, tactical allocation, the fund leverages our proprietary 'Adaptive Asset Allocation' model to balance exposures between large, mid, and small caps with discipline and precision. During August 2026, exposure to Healthcare (+5.93%), Oil & Gas (+3.88%) and Auto (+3.40%) was increased while Financial Services (-6.11%), Telecom (-3.23%) and Power (-2.42%) were reduced. The fund aims to deliver consistent, risk-adjusted returns through active positioning and robust risk management. **EWMA Holdings-based portfolio beta (equity): 0.59**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Large Cap Fund

Normalized as of 11/08/2022 - Data as of Date 31/08/2026

quant Large Cap Fund - Direct (G) (% Return) 67.8570  
NIFTY 100 TR Index (% Return) 47.0701  
Nifty 50 TRI (% Return) 42.7693

quant Large Cap Fund is a well diversified scheme with the freedom to invest across large-cap companies, which are perceived to be stable companies with less volatility and enjoying high liquidity. This scheme is ideal for long-term investors with medium risk appetite. During August 2026, exposure to Oil & Gas (+7.31%), Realty (+2.40%) and Financial Services (+1.63%) was increased while exposure to IT (-9.60%), Power (-1.03%) and Telecom (-0.73%) was reduced. Our positioning remains anchored in quality, liquidity, and fundamental strength to ensure a more resilient portfolio construct. **EWMA Holdings-based portfolio beta (equity): 0.76**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Large & Mid Cap Fund

quant Large & Mid Cap Fund is a focused allocation scheme to construct a long-term portfolio composing of both large and mid-cap companies with the freedom to invest across emerging sectors. This provides exposure to high growth potential of midcaps along with relatively lower volatility of large caps. This scheme is ideal for long-term investors with medium risk appetite. During August 2026, exposure to Construction Services (+2.64%) and Healthcare (+2.24%) was increased while IT (-4.03%), Metals (-1.56%) and Power (-1.37%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.58**

**quant**  
**LARGE AND MID-CAP FUND**  
 (An open ended equity scheme investing in both large cap and mid cap stocks)

| Since Inception | 1640000                 | 2360000 | 6472920            | 13747310 | 18.38          | 15.69   | 5282562            | 15.78          | 3907412            | 11.88          |

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Infrastructure Fund

quant Infrastructure Fund invests majorly in infrastructure theme stocks with the freedom to invest across market caps. The scheme benefits from the massive scope of infrastructure investment opportunities which will continue to expand to meet demand for developing and modernizing critical infrastructure. This scheme is ideal for long-term investors with high risk appetite. During August 2026, exposure to Power (+1.13%), Auto (+1.11%) and Construction (+0.61%) was increased while Capital Goods (-2.01%), Metals (-0.92%) and Telecom (-0.49%) were reduced. The core portfolio remains infra focused with a large-cap skew. **EWMA Holdings-based portfolio beta (equity): 0.57**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Aggressive Hybrid Fund

Normalized as of 31/03/2020 - Data as of Date 31/08/2026

quant Aggressive Hybrid Fund - Direct (G) (% Return) 347.7104  
NIFTY 50 Hybrid Composite Debt 65:35 Index (% Return) 138.5926  
Nifty 50 TRI (% Return) 202.1644

quant Aggressive Hybrid Fund is a unique strategy product with majority allocation to equities and invests across sectors and market. Smaller allocation is spread across low risk debt instruments and money market instruments. This scheme is ideal for long-term investors with medium to low risk appetite. The majority of current portfolio construct contains high-quality large-cap names and highly-rated debt securities. The stock selection has been made keeping in mind high margin of safety. During August 2026, exposure to Oil & Gas (+7.89%) and Healthcare (+6.00%) was increased while exposure to IT (-7.00%), Financial Services (-3.17%) and Power (-1.37%) was reduced. The fund is managed with an emphasis on maintaining low volatility over the long term while aiming to deliver steady, risk-adjusted returns through a balanced allocation approach. **EWMA Holdings-based portfolio beta (equity): 0.55**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Value Fund

quant Value Fund investments go beyond selecting securities merely on the basis of a statistical measure indicating which stocks are less expensive. By using Multi-dimensional research and Predictive Analytics, the fund endeavors to distinguish temporary cycles from permanent shifts and if the change is secular, to estimate its impact with reasonable accuracy. During August 2026, exposure to Telecom (+1.28%), Financial Services (+0.90%) and Capital Goods (+0.31%) was increased while Realty (-0.86%), Power (-0.83%), Metals (-0.63%) and IT (-0.38%) were reduced. The fund continues to hold stocks with potential of value creation over next 3-5 years' horizon. This scheme is ideal for long-term investors with high risk appetite. **EWMA Holdings-based portfolio beta (equity): 0.74**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Momentum Fund

quant Momentum Fund is a unique scheme which is designed to manage both near-term and short-term risk efficiently and this not only reduces the risk but also generates alpha in the medium-term. This scheme is ideal for long-term investors with high risk appetite. Over the last few months, both earnings momentum and price momentum has improved, but impact costs remain on the higher side. During August 2026, exposure to Oil & Gas (+5.16%) and Financial Services (+4.07%) was increased while IT (-3.32%), Healthcare (-2.17%) and Power (-1.02%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.62**

| Since Inception | 340000                  | 340000  | 387923             | 380925  | 9.30           | 7.99    | 369083             | 5.73           | 351444             | 2.29           |

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Arbitrage Fund

quant Arbitrage Fund is a tax efficient alternative for risk-averse investors to park their short-term and medium-term funds. The scheme aims to actively identify arbitrage opportunities and execute simultaneous trades in both spot and futures markets, aiming for market neutrality where the buy and sell positions are fully hedged (100%). **EWMA Holdings-based portfolio beta (equity): 0.00**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

**CONTRIBUTION BY MARKET CAP**

**PORTFOLIO CONCENTRATION**

| Top Holding | % of Portfolio |
|-------------|----------------|

| 30            | 48.11           |

## quant Dynamic Asset Allocation Fund

The unique feature of the scheme stems from its mandate to dynamically rebalance equity exposure (65% to 100%) and debt exposure (0 to 35%), in line with our view on Risk-On or Risk-Off environment. This approach brings diversification and moderates portfolio volatility by limiting extreme outcomes and optimizing inflection points. Active rebalancing is done to adapt to macro environment. This scheme is ideal for medium to low risk appetite investors. Equity exposure has increased by more than 17% as of end-August 2026. The current portfolio construct has a large-cap skew. During the month, exposure to Oil & Gas (+9.59%), Healthcare (+4.04%) and Financial Services (+3.05%) was increased while Power (-0.39%), Telecom (-0.27%) and Metals (-0.17%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.45**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Focused Fund

quant Focused Fund is a large-cap focused scheme with the freedom to invest across sectors. This scheme is ideal for long-term investors with medium risk appetite. As of end-August 2026, the scheme remains predominantly large-cap focused with a concentrated portfolio of highly liquid stocks. Although it is a focused fund, the portfolio is well-diversified across sectors. During August 2026, exposure to Oil & Gas (+9.42%), Consumer Durables (+5.56%) and Power (+3.36%) was increased while IT (-5.44%) and Healthcare (-3.43%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.70**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Manufacturing Fund

Normalized as of 14/08/2023 - Data as of Date 31/08/2026

quant Manufacturing Fund invests in companies with strong profit potential from production & exports, on the back of technology & automation, including those benefiting from the government's 'Make in India,' PLI, and export incentives. The scheme has flexibility to invest in companies across market caps and several manufacturing industries in order to optimize the risk-return payoffs. During August 2026, exposure to Oil & Gas (+8.70%), Healthcare (+7.32%) and Consumer Durables (+1.06%) was increased while Telecom (-7.04%), Metals (-3.49%), Capital Goods (-2.91%) and Power (-1.89%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.48**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant PSU Fund

Normalized as of 20/02/2024 - Data as of Date 31/08/2026

quant PSU Fund - Direct (G) (% Return) 8.9490  
Nifty PSE TRI 7.3832  
Nifty 50 TRI (% Return) 11.9462

The fund seeks to leverage the potential value of PSU stocks unlocked through disinvestment or divestment, and benefit from their significant contribution towards making India the world's third-largest economy. During August 2026, exposure to Financial Services (+18.93%), Services (+10.19%) and Capital Goods (+4.95%) was increased while Oil & Gas (-21.94%) and Metals (-7.82%) were reduced. The portfolio remains well diversified and we remain watchful of any signs of slowdown in Government capex and will continue to rebalance the portfolio to position the portfolio in the right pockets. **EWMA Holdings-based portfolio beta (equity): 0.68**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Healthcare Fund

quant Healthcare Fund invests in healthcare, life sciences, insurance and wellness companies that are expected to benefit from increased investments in healthcare infrastructure and service delivery, including advanced medical technology. We remain highly constructive on the sector's long-term prospects, especially in the context of ongoing global uncertainties. The current portfolio is well-diversified, with balanced exposure across US generics, domestic and international branded formulations, and healthcare services. During August 2026, Pharmaceuticals allocation increased by (20.29%), while Hospitals (-9.25%) was reduced. Given its resilient business models, defensive characteristics, and favourable long-term demand drivers, healthcare continues to be one of our preferred sectors for sustained allocation. **EWMA Holdings-based portfolio beta (equity): 0.25**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant ESG Integration Strategy Fund

The scheme is managed by combining traditional top-down and bottom-up financial analysis with rigorous analysis of ESG aspects of the companies. This disciplined process continues to support the portfolio's alignment with responsible and sustainable investing principles. As of end-August 2026, exposure to Consumer Services (+9.07%), Oil & Gas (+6.33%) and Consumer Durables (+4.45%) was increased while Healthcare (-9.38%), IT (-7.04%) and Financial Services (-3.13%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.57**

| Since Inception | 700000                  | 700000  | 1289121            | 1219051 | 20.86          | 18.92   | 952445             | 10.45          | 900721             | 8.55           |

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Teck Fund

quant Teck Fund scheme invests in opportunities across Tech, Media, Telecom (TMT) sectors that exhibit transformational power of research & innovation and the digital prowess to bring about superior business outcomes. While new-age technology companies have delivered strong performance, we have consciously remained underweight in this segment due to limited conviction on their long-term business viability and elevated valuations. During August 2026, exposure to Oil & Gas (+9.33%), Consumer Services (+9.30%) and Telecom (+1.68%) was increased while IT (-21.30%) and Services (-2.62%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.82**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

## quant Consumption Fund

Primarily invests in companies that benefit from the huge multi-decade opportunity in the Indian consumption landscape. The fund aims to actively identify and invest in companies, which are most likely to benefit from increased consumer spending and affluence. The scheme has positioned itself across ten sectors within the broader consumption space, with the highest allocation to the Fast-Moving Consumer Goods industry. It is constructed with a view toward long-term structural themes and emerging trends. Given that the consumption basket has historically traded at relatively expensive valuations, our stock selection framework prioritizes companies with stronger long-term prospects. We are watchful of pockets benefiting from GST 2.0 and other emerging trends. During August 2026, exposure to Oil & Gas (+9.41%), Financial Services (+5.34%), Realty (+3.20%) and Healthcare (+2.81%) was increased while Consumer Durables (-12.58%), Telecom (-8.27%) and Auto (-2.99%) were reduced. **EWMA Holdings-based portfolio beta (equity): 0.46**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

| 30            | 8.45            |

## quant Equity Savings Fund

The scheme is designed for risk-averse investors — including first-time equity participants and those transitioning from fixed deposits — who prefer lower volatility compared to traditional equity schemes. Its allocation dynamically adjusts to prevailing market conditions. During risk-off phases, unhedged equity exposure is reduced meaningfully through higher arbitrage and hedging positions; in risk-on phases, unhedged exposure is increased by scaling down these positions. As of end-August 2026, total equity exposure increased to ~74%, while hedging positions were at ~42%. **EWMA Holdings-based portfolio beta (equity): 0.17**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

**CONTRIBUTION BY MARKET CAP**

| 30            | 65.00           |

## quant Multi Asset Allocation Fund

quant Multi Asset Allocation Fund is a core, all-weather strategy designed for long-term investors with a lower risk appetite who still seek meaningful participation in equity-led wealth creation. The fund enjoys complete flexibility to invest across market capitalisations, sectors, debt securities, and Gold & Silver ETFs—dynamically rotating allocations in response to evolving market conditions. During August 2026, exposure to Oil & Gas (+9.06%) and Healthcare (+1.27%) was increased while Financial Services (-10.18%), IT (-1.59%) and Capital Goods (-1.57%) were reduced. We remain constructive on the long-term precious metals cycle and will look to scale allocations judiciously as market signals turn favourable. **EWMA Holdings-based portfolio beta (equity): 0.36**

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

**CONTRIBUTION BY MARKET CAP**

**INVESTOR CONCENTRATION**

| Top Investors | % Concentration |

| 30            | 49.20           |

## quant Gilt Fund

quant Gilt Fund Invests in Central and State government securities across maturities and other debt instruments. The fund takes duration calls basis the underlying interest rate view and actively manages interest rate risk. It aims to play across the interest rate curve by investing in G-secs across maturities to generate capital gains. This scheme is ideal for risk-averse investors with very low risk appetite.

*Trust contributes to happiness*

### Fund Manager Details

|                       |                     |
|-----------------------|---------------------|
| Name of Fund Manager: | Sanjeev Sharma      |
| Total Experience:     | 20 Years            |
| Managing Since:       | 05 December 2022    |
| Name of Fund Manager: | Haroovardhan Sirohi |
| Total Experience:     | 6 Months            |
| Managing Since:       | 20 February 2026    |

### Minimum Investment

|                  |      |
|------------------|------|
| Lump sum Amount: | 5000 |
| SIP Amount:      | 1000 |

### Load Structure

|                   |     |
|-------------------|-----|
| Exit Load if any: | Nil |
|-------------------|-----|

### Expense Ratio

|               |       |
|---------------|-------|
| Regular Plan: | 0.26% |
| Direct Plan:  | 0.19% |

### Fund Performance:

#### Performance of scheme in Tabular form

| Compounded Annualised Returns | Scheme Returns % - Regular | Scheme Returns % - Direct | Benchmark Returns % |
|-------------------------------|----------------------------|---------------------------|---------------------|
| Returns for last 1 year       | 5.00%                      | 5.09%                     | 0.05%               |
| Returns for last 3 year       | 6.09%                      | 6.18%                     | 0.06%               |
| Returns for last 5 year       | N.A.                       | N.A.                      | N.A.                |
| Returns since inception       | 6.19%                      | 6.30%                     | 0.06%               |

#### Absolute Returns for each F.Y. for last 5 years

### Quantitative Measures / Risk Measures\*

|   |                           |       |
|---|---------------------------|-------|
| 1 | Average Maturity (years)  | 0.00  |
| 2 | Macaulay Duration (years) | 0.00  |
| 3 | Modified Duration (years) | 0.00  |
| 4 | Yield to Maturity (%)     | 5.01% |

| Since Inception             | 6.30              | 6.19    | 6.22                 | N.A.             | 12,567                      | 12,520  | 12,530    | N.A.  |

<sup>^</sup>Since Inception Date = Date of First allotment in the Scheme / Plan. Past performance may or may not be sustained in the future. Returns are compounded annualized (CAGR) for more than 1 year. Load is not taken into consideration for computation of performance. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. XIRR formula is used for SIP calculations of Rs. 10,000 invested on 1st Business Day of each month.

| INVESTOR CONCENTRATION |                 |
|------------------------|-----------------|
| Top Investors          | % Concentration |

| 20                     | 24.34           |
| 30                     | 29.51           |

**Description/Inference of the Quantitative/Risk Measures**

| Sr. No. | Quantitative Measures/Risk Measures | Brief description/ Inference of the Quantitative measure                                                                                                                                                                                                            |
|---------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | Beta                                | Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.          |
| 2       | Macaulay Duration                   | Macaulay Duration is a measure of the average time it takes to receive a bond's cash flows. It is calculated by summing up all the multiples of the present values of cash flows and corresponding time periods and then dividing the sum by the market bond price. |
| 3       | Modified Duration                   | Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.                                                                                                                                                           |
| 4       | Scheme Category                     | A mutual fund scheme category is the classification of mutual fund schemes based on their underlying assets, risk profile, or investment objective, such as Equity, Debt, Hybrid, Thematic/Sectoral schemes, Solution oriented schemes and ETFs/Index Funds, etc.   |
| 5       | Sharpe Ratio                        | The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.                                              |
| 6       | Standard Deviation                  | Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means it's range of performance is wide, implying greater volatility.                                                 |
| 7       | Tracking Difference                 | Tracking differences, i.e. the annualized difference of daily returns between the index or goods and the NAV of the ETF/ Index                                                                                                                                      |
| 8       | Tracking Error                      | A divergence between the price behavior of a position or a portfolio and the price behavior of the benchmark.                                                                                                                                                       |
| 9       | Yield to Maturity                   | The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.                  |

## Liquidity Analytics

- Liquidity Analytics indicates number of days that will be required to liquidate 50% and 25% of the portfolio respectively on a pro-rata basis, under certain conditions.
- For this 3 times the combined volumes on NSE and BSE has been considered.
- Assuming a participation of 10%, number of days to liquidate each stock is calculated.
- While calculating the time taken to liquidate portfolio on pro-rata basis, the 20% of least liquid securities of the portfolio are ignored.
- The number of days required to liquidate the balance portfolio shall be the maximum number of days required for liquidating a stock in such portfolio. Such number of days would be divided by two to indicate the days required for liquidating 50% portfolio and by four to indicate days required to liquidate 25% of the portfolio.
- The above methodology is as per the guidelines issued by AMFI in consultation with SEBI in relation to mid and small cap schemes. We are extending the same methodology to all our schemes and its respective benchmarks as well, after rebasing the size of the benchmark to the respective schemes' AUM.

| Schemes Name                        | No. of days (Scheme) |     | No. of days (Benchmark) |     |

# Glossary

The ratios provided are based on historical data, where available.

## Sharpe Ratio:

**Definition:** The Sharpe Ratio measures the risk-adjusted performance of an investment or portfolio. It measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

### Formula:

Sharpe Ratio =  $(R_p - R_f) / \sigma_p$

$R_p$ : Average return of the portfolio

$R_f$ : Risk-free rate of return

$\sigma_p$ : Standard deviation of the portfolio's returns

### Interpretation:

A higher Sharpe Ratio indicates better risk-adjusted performance.

## Sortino Ratio:

**Definition:** The Sortino Ratio is a variation of the Sharpe Ratio, focusing on the downside risk. It considers only the standard deviation of the negative returns (downside deviation) when assessing risk.

### Formula:

Sortino Ratio =  $(R_p - R_f) / \sigma_d$

$R_p$ : Average return of the portfolio

$R_f$ : Risk-free rate of return

$\sigma_d$ : Downside deviation (standard deviation of negative returns)

### Interpretation:

A higher Sortino Ratio indicates better risk-adjusted performance, but it specifically addresses the downside risk.

## Jensen's Alpha:

**Definition:** Jensen's Alpha, also known as the Jensen Index or Jensen's Performance Index, measures the excess return of an investment or portfolio compared to its expected return, given its level of risk as measured by the capital asset pricing model (CAPM).

### Formula:

Jensen's Alpha =  $R_p - [R_f + \beta_p (R_m - R_f)]$

$R_p$ : Actual portfolio return

$R_f$ : Risk-free rate of return

$\beta_p$ : Beta of the portfolio (systematic risk)

$R_m$ : Market return

### Interpretation:

A positive Jensen's Alpha suggests that the portfolio has outperformed its expected return based on its level of risk.

## R-Squared:

**Definition:** R-Squared (Coefficient of Determination) measures the proportion of the variation in the portfolio's returns that can be explained by the variation in the benchmark's returns. It ranges from 0 to 1, where 0 indicates no correlation, and 1 indicates a perfect correlation.

### Formula:

Calculated as part of the regression analysis comparing the portfolio's returns to the benchmark's returns.

### Interpretation:

A higher R-Squared indicates a stronger correlation between the portfolio and its benchmark.

## Downside Deviation:

### Definition:

Downside Deviation measures the volatility of the returns that fall below a certain minimum acceptable return or threshold (often the risk-free rate).

### Formula:

Standard deviation of returns that are below the threshold.

### Interpretation:

A lower downside deviation suggests less volatility in the undesirable direction (below the threshold), indicating better risk management.

## Upside Deviation:

### Definition:

Upside Deviation measures the volatility of the returns that exceed a certain minimum acceptable return or threshold (often the risk-free rate).

**Formula:** Standard deviation of returns that are above the threshold.

### Interpretation:

A lower upside deviation indicates less volatility in the favorable direction (above the threshold), suggesting a more stable and consistent performance in positive market conditions.

**Example:**

Assume the following data for Fund ABC and the benchmark over a specific period:

- Average Fund Return: 12%
- Risk-Free Rate: 3%
- Standard Deviation of Fund Returns: 15%
- Downside Deviation: 8%
- Beta (Systematic Risk): 1.2
- Market Return: 10%
- Actual Portfolio Return: 14%
- Correlation coefficient with the Market: 0.8
- Positive Returns: 5%, 8%, 12%, 15%, 18%
- Negative Returns: -2%, -4%, -1%, -5%, -3%

Sharpe Ratio = (Average Return - Risk-Free Rate) / Standard Deviation of Returns

Sharpe Ratio = (12% - 3%) / 15% = 0.6

Sortino Ratio = (Average Return - Risk-Free Rate) / Downside Deviation

Sortino Ratio = (12% - 3%) / 8% = 1.12

Jensen's Alpha = Actual Portfolio Return - [Risk-Free Rate + Beta \* (Market Return - Risk-Free Rate)]

Jensen's Alpha = 14% - (3% + 1.2 \* (10% - 3%)) = 2.6%

R-Squared = (Correlation coefficient)<sup>2</sup>

R-Squared = (0.8)<sup>2</sup> = 0.64

Downside Deviation = Square Root of (Average of Squared Negative Returns)

Downside Deviation ≈ Square Root of [(-2%)<sup>2</sup> + (-4%)<sup>2</sup> + (-1%)<sup>2</sup> + (-5%)<sup>2</sup> + (-3%)<sup>2</sup> / 5] ≈ 3.06%

Upside Deviation = Square Root of (Average of Squared Positive Returns)

Upside Deviation ≈ Square Root of [(5%)<sup>2</sup> + (8%)<sup>2</sup> + (12%)<sup>2</sup> + (15%)<sup>2</sup> + (18%)<sup>2</sup> / 5] ≈ 6.88%

ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the fund's portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of 'credit scores'. These scores are based on ICRA's estimates of credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories for various maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality.

# Point of Service (PoS) Locations

## KFIN Technologies Private Limited

**Agartala:** Bidurkarta Chowmuhani, J N Bari Road, Tripura ( West ), Agartala - 799001. **Agra:** 1st Floor, Deepak Wasan Plaza, Behind Holiday Inn, Opp Megdoot Furnitures, Sanjay Place, Agra - 282002. **Ahmedabad:** 201/202 Shail, Opp: Madhusudan House, Navrangpura, Ahmedabad - 380006. **Ajmer:** S.
