Gold (\$/Oz)	7.86	22.22

EQUITY OUTLOOK-

Indian equity markets witnessed a volatile and weak Feb'26, with benchmark indices ending the month marginally lower. The biggest drag was the IT sector, which saw a steep correction on concerns around AI-led disruption, margin pressures, and weak global tech sentiment, making it the worst-performing space and weighing heavily on the headline indices. Global factors- including rising crude oil prices due to Middle East tensions and intermittent foreign portfolio investor outflows- kept risk appetite subdued, although domestic macro indicators and earnings trends remained relatively resilient. Sector-wise, PSU banks, select financials, metals, and consumer durables showed relative strength on expectations of steady credit growth and domestic demand recovery, while IT was the clear underperformer, and pockets of weakness were also visible in FMCG, auto, and realty during broader risk-off phases.

March has begun with a major escalation in Middle East tensions after coordinated military strikes by Israel and the USA against targets inside Iran, aimed at degrading Iran's missile and military capabilities and responding to perceived security threats, including its nuclear programme. This has significantly raised global geopolitical risk and begun to impact investor sentiment and markets worldwide. As concerns grew about disruptions

to energy supplies- especially through the Strait of Hormuz, a chokepoint for roughly one-fifth of global oil shipments- oil prices surged sharply (with Brent crude leaping into the high \$70s and briefly above \$80 a barrel), while global equity markets falling on heightened risk aversion. Investors have gravitated toward safe-haven assets like gold, government bonds and defensive currencies, and markets sensitive to economic growth and commodity costs have shown increased volatility and downside pressure. The uncertainty around the duration and spread of the conflict has made markets cautious, as elevated energy prices can feed through into inflation and impact trade balances, corporate earnings and broader economic outlooks globally.

In Jan'26, equity MFs saw inflow of INR 384bn. SIP inflow was flat in Jan'26 vs. Dec'25 at INR 310bn. Outstanding SIP accounts increased by 1.8mn MoM while the number of new SIPs registered (gross) rose by 1.4mn from 6mn in Dec'25 to 7.4mn in Jan'26. Furthermore, closure of SIP accounts stood at 5.5mn, taking the ratio of discontinued SIPs as a percentage of new SIPs to 75%. Equity NFOs in Jan'26 fell to INR 8bn versus INR 37bn in Dec'25. Fund type wise Flexi Cap continues to be the most favoured and received inflows of 76bn, followed by Mid-Caps / Large-Caps & Mid-Caps and Small-Caps 31.9bn / 31.8bn / 29.4bn while Large-Caps received 20bn.

Headline CPI inflation for Jan'26, came in at 2.8% yoy vs. 1.3% in Dec'25. On a yoy basis, food & beverage prices increased by 2.1% (vs. 1.8% decline in Dec'26). Although food inflation has turned positive, but the weight of food in CPI index has reduced by ~10%, so it's impact on headline inflation will be limited. February Manufacturing PMI rose to 56.9 vs. 55.4 in the last month. Manufacturers reported that increased client demands, marketing campaigns, and demand buoyancy supported yet another increase in new business intakes. Export growth slowed during the month, but the domestic market drove the sales upturn. Employment levels marginally increased. Gross GST collection rose to INR 1.83 lakh crore in Feb'26, reporting a rise of by 8.1% as compared to the same period last month. The total GST revenue for FY26 as on FYTD stood at INR 20.27 lakh crore, up 8.3% yoy.

Going forward, markets will closely track incremental developments in the ongoing geopolitical conflict, as any escalation or signs of de-escalation will directly influence crude oil prices and, in turn, the trajectory of the rupee and domestic inflation. With energy costs already elevated, sustained volatility in oil remains a key near-term macro risk, shaping currency stability, inflation expectations and overall market sentiment.

Global news, inflation and Central Bank actions:

US non-farm payrolls surprised on the upside in January printing in at 130K (exp: 65K), although there were downward revisions of -17K that were made to the previous two months for November (-15K) and December (-2K). The unemployment rate printed below expectations at 4.3% in January from 4.4% in December.

US Core CPI inflation came in weaker than we had expected, rising by 0.295% m-o-m. Core CPI goods prices were essentially unchanged (+0.04% m-o-m) in January, as used vehicle prices dropped sharply by 1.8%.

US Real GDP grew just 1.4% q/q saar in Q4 well below prior quarters and consensus, largely reflecting a drop in shutdown-induced government spending. Private domestic demand remained resilient, supported by solid consumer spending and strong AI-related business investment.

During the month, US Supreme Court invalidated IEEPA tariffs, but a new interim 10% tariff and potential Section 301 tariffs are likely to provide an offset. This has caused uncertainty about already announced deals. EU is seeking clarity from the US about its longer-term tariff plans.

US retail sales unexpectedly stalled in December, following a 0.6% increase in November and falling short of forecasts for a 0.4% gain.

Japanese Prime Minister Sanae Takaichi's coalition swept to a historic election win paving the way for promised tax cuts that have spooked financial markets and military spending aimed at countering China.

The European Central Bank kept interest rates unchanged, with President Christine Lagarde describing inflation as being in a “good place.” The BoE maintained status quo in a split vote in what appeared to be a close call given that the MPC voted 5-4 for the action with Governor Bailey working as the primary swing voter.

China-CPI inflation slowed to 0.2% y-o-y in January from 0.8% in December, falling short of expectations, while PPI deflation eased to -1.4% y-o-y in January from -2.2% in December, slightly above expectations

Japan's GDP grew 0.1% q-o-q in Q4 2025, rebounding from a 0.7% drop in Q3 but missing market forecasts of a 0.4% increase, flash data showed.

Domestic economy, inflation, INR & rates outlook:

On February 2, 2026, the US and India reached a significant trade agreement that marked a clear reversal of recent tensions. Under the deal, the US agreed to reduce India's effective tariff rate to 18% from 50%, rolling back the reciprocal tariffs and penalties imposed earlier in response to India's purchases of Russian oil. The revised tariff framework places India marginally ahead of other Asian emerging markets in terms of export competitiveness. After the agreement with US, India now has trade agreements with 20 geographies covering ~66% of global markets.

The RBI MPC voted unanimously to keep the policy repo rate unchanged at 5.25% at the February meeting and retain the "neutral stance", in-line with expectations. The RBI raised its FY26 real GDP forecast by 10bp to 7.4% YoY and revised up its inflation forecast for FY26 by 10-bps to 2.1%. Q1FY27 and Q2FY27 inflation forecasts have also been revised upwards to 4.0% and 4.1%, respectively.

India's first CPI print under new 2024 series was in alignment with expectation at 2.75% for the month of January. Most notable change in the new series has been the food and beverage weight has been reduced to 36.75% from 45.86%.

The month also saw first GDP print with new base year to 2022–23. This has raised real GDP growth estimates for FY26 to 7.6% YoY as per the Second Advance Estimates (from 7.4% YoY in First Advance Estimates). Nominal GDP values are lower in the new series throughout FY23 to FY26 and the government would have to reduce the fiscal deficit to reach 4.3% of fiscal deficit target in FY27. The bigger issue is the debt to GDP ratio, which is now estimated at 57.5% compared to 55.6% in the earlier series, due to a change in nominal GDP for FY27. This implies that greater fiscal consolidation could be needed in subsequent years to achieve the 50+/-1% target set for FY31.

India's trade deficit widened to USD 34.7bn in Jan and stood at USD 283bn during Apr-Jan 2026 (USD 247bn in same period last year) due to moderation in exports and acceleration in imports. However, with strong services exports in the month of Jan, CAD should stay manageable for current fiscal year.

The month ended with rising geopolitical tension as US and Israel launched their most aggressive attack ever on Iranian targets over that killed the Islamic state's longtime supreme leader Ayatollah Ali Khamenei, thrusting the region into a widening conflict as Tehran retaliates with air strikes across the Middle East. Energy prices have surged in the

wake of the US-Israel attacks on Iran and Tehran's retaliatory strikes on Gulf neighbors. Traffic through the Strait of Hormuz has dried up.

GST collections rose 8.1% YoY in February to INR 1.84tn, supported by resilient domestic demand and higher import-related revenues. The uptick reflects steady consumption trends and the sustained impact of GST reforms.

RBI and government of India switched securities maturing in next year to the tune of INR 700 bn which brings next FY gross borrowing to INR 16.5tn. in line with what market expected in the budget. Subsequently RBI also conducted switches with market participants bringing down to gross borrowing for next year at ~ INR 16tn.

Post announcement of borrowing numbers the benchmarks yield budget sell inched higher by ~ 6 bps but sharply reversed next day on trade deal announcement and subsequent day aggressive acceptance by RBI in OMO auction. The market continued to trade in this same range of 6.65-6.75% in the remaining month.

The market would be keenly watching the development on the geopolitical front, details on announcement on centre borrowing calendar for first half and states borrowing for first quarter as well as demand at the remaining auction for trajectory of rates market.
